*Welcome to the 3rd Annual Southwest Showcase Simmental Bull Sale. I want to congratulate this group of six Simmental seed stock producers for identifying a need and addressing it. This southwest area is one of the largest producers of commercial beef cattle in Western Canada and there really was not a Simmental bull sale addressing their needs. The Southwest Showcase breeders produce bulls right in their commercial customers backyard. They develop, feed and present them in a manner their neighbours and customers can relate to. The potential herd bulls are sired by either proven walking herd bulls or AI sires that are proven breed leaders. As in the first and second sale, the consignors will bring you bulls selected from the top of their bull pens. I urge you to visit with these hands on producers about your herd bull needs. They will be happy to show you the bulls on offer as well as the cow herd if you desire.*

*Gary Rairdan and myself will be very familiar with the bulls on offer and would be happy to assist you in any way you require. We will be available at Heartland in Swift Current the day before the sale and, as always, welcome your calls. If you are unable to attend we would be honoured to represent your needs in a professional and confidential manner. - Brian Bouchard*

## SALE HEADQUARTERS

Holiday Inn Express 1-877-654-0228

## CATALOGUE PRODUCTION

JoAnna Anderson - Bouchard Livestock Int'l

## MEAL

Please join us for a pre-sale lunch at noon

## SIGHT UNSEEN PURCHASE PROGRAM

If you are unable to attend the sale but are interested in bulls, give the consignors a call and they will personally go over the bulls and your program and recommend bulls that would meet your needs and refer you to one of the sale staff who will represent your needs in a professional and confidential manner.

## 100% GUARANTEE

All bulls are guaranteed to be satisfactory breeders in accordance with CSA guidelines. Should a problem occur barring physical injury or mismanagement, a bull of equal value will be provided or a credit will be issued towards the purchase of another bull. We guarantee you will have a bull to service your cows.

## VOLUME DISCOUNT

5% discount on purchases of 3 or more bulls.

## IN-HERD USE SEMEN RIGHTS

The Southwest Showcase consignors reserve the right to collect semen on any bull in the sale for their in-herd use only. Any questions please contact the consignors.

## HEALTH AND FERTILITY

All bulls will have a scrotal measurement and a vet examination done prior to the sale. All bulls over 12 months of age will also be semen tested; any bulls under 12 months of age will return to the seller's farm to be tested after the sale. These bulls will be delivered once a semen test has been passed. All bulls have been treated with Ivomec and have current vaccinations. Contact the breeder for specific herd health programs.

## BULL DEVELOPMENT & DELIVERY

The Southwest Showcase consignors will keep bulls free of charge until May 1st, 2010. Buyers need to insure the bulls while being cared for by the consignors.

Option A: Bulls can be picked up at Heartland Livestock sale day and a \$50 discount will be deducted from the sale price

Option B: At the buyer's option and risk, the bulls can be returned to the consignor's farm and picked up anytime at the buyer's convenience.

Option C: Please make arrangements with the consignor if trucking is required.

## TERMS & CONDITIONS

The cattle will sell under the standard Bouchard Livestock International terms & conditions. These are on the inside back cover.

## EPD EXPLANATION

EPDs are "Expected Progeny Differences". They are a useful tool in selection. EPDs incorporate the individual animal with its averaged ancestry performance. EPDs do not compare across cattle breeds, they are individually based per breed. EPDs indicate a probable variance above or below breed average for that trait for a given bull's progeny. Use them for guidance in the direction you want your herd to go.

CSA Averages: Expected Progeny Differences

Welcome to our Third Annual Sale. We would like to thank everyone who helped make last year's sale such a great success. We would like to express our appreciation to all buyers and bidders of our bulls.

For over 40 years we have been selling bulls and working to breed hardy, trouble free cattle. We believe very strongly in building around cow families that have proven themselves to be superior. Some of these families are the 52C Red Bear daughter that was very reliable and at 16 years of age still had perfect feet & udder. Two full sisters by Americana, 29G & 10E whose influence is always seen in the bull pen and when we select replacement heifers. The 68D Blue Print cow that mysteriously shows up in the pedigree of many of the good ones. 46Z, a Universe daughter, was part of the early foundation of our herd. We have retained most of the daughters and many of the sons from these families. We have done some line breeding of these families with good results.

We are pleased with the group of bulls we have to offer. Of 124 born, only 75 were retained as bulls and 21 of those were selected for this sale. We present them as we would like to buy them, not over fed, no feet trimmed, semen tested and ready to breed cows. We stand behind our bulls, and have backup bulls available, so if any problems arise please do not hesitate to call.

Our cow herd receives Pyramid 5FP before breeding. All calves have received 2 shots of Pyramid 5FP, Presponse SQ, Seven Way Somnus and Ivomec.

We welcome your calls or visits, any time, any day, to view the bulls at the farm.

1

## EDN TEXAN 140Y

PG757140 EDN 140Y POLLED PUREBRED 22 FEB 11

*Wide load coming through! Our top selling black at last year's sale was also Red Texas x Dream On, selling to Town View Farms. Texan is every bit as good. He packs a lot of meat and muscle on his moderate frame with a ton of capacity to convert forage. Very sound structurally and so fluid in his movement. Unlimited potential, don't miss him.*

*His dam is a really good, easy fleshing cow that is one of those trouble free cows. She has an outstanding daughter retained. We would like to reserve the right to draw semen for use in our herd.*

## EDN SPROUT 15Y

PG757123 EDN 15Y POLLED PUREBRED 20 JAN 11

15Y is a moderate, very good footed bull that resembles his sire. Full of guts, with a big butt and huge testicles. Excellent disposition and Homo Polled. You will want his daughters for herd replacements.

27U is a good, young Gunner daughter from the 52C family.

The sire, EDN Sprout 48S, was retained as a backup bull, but has become an important part of our program. At 6 years of age, his feet are perfect, his attitude is unbelievable and he is the type of bull that will easily maintain and even fatten on hay. He is a grandson of the 29G cow.

## EDN SPROUT 192Y

PG757145 EDN 192Y POLLED PUREBRED 23 MAR 11

A late March calf that is long bodied, good haired Sprout son that represents his sire well. 192Y is a long strided bull that steps past his track with the hind legs. Really good muscling, testicles, and easy going.

He is the result of line breeding between 10E and 29G, two Americana full sisters. Again, the daughters should be keepers. His dam is a larger framed, good milking cow with a perfect udder.

## EDN LANCER 90Y

PG757132 EDN 90Y POLLED PUREBRED 08 FEB 11

A long, smooth, clean fronted, tight sheathed bull that has been popular with visitors. 90Y should work well on heifers or cows. One of the most complete herd sires in our offering. From a 68lb BW to 1224lbs at a year. Top 1% of the breed for calving ease.

His moderate, easy fleshing, black 2 year old dam is a favorite in our herd. She is sired by EDN Toledo 86T, a Red Label son owned by Birch Creek Ranch. Toledo produced 2 feature bulls for our 2010 sale after very limited use in our herd. The Grand Dam by EDN Punch is also the dam of 175Y (Lot 20).

Gestation - 284d

## EDN DR. OZ 47Y

PG757128 EDN 47Y POLLED PUREBRED 28 JAN 11

Dr. Oz is a dark cherry red, very interesting, Herd sire that would be a complete outcross for many herds. Dr. Phil X EDN Morton X Red Fred. He has good thickness across his topline, spring of rib and muscling in his rump. Nice hair coat, disposition and large testicles. Nicely balanced EPD's.

His highly productive and fertile dam was Amanda's 4-H project as a yearling heifer. All her calves have been A.I. sired which means she has conceived on her first breeding annually. Four daughters have been retained in our herd. A son sold to Don Cholin. Her sire EDN Morton - Lucky Dice X Black Cisco and 52C was the foundation sire of our black program. Morton is also the sire of EDN Punch 75P and Grand sire of EDN Sambo 192S now owned by Crocus Simmentals.

Homozygous Polled

Dam:

EDN RED 118R

With Big Sky, Bravado and LFE Bulletproof, 8Y has a stacked pedigree for calving ease and maternal traits. Big Sky daughters are some of the best producing cows in the breed.

Red Sky is a long spined and docile with good hair and testicles. Notice his EPD of 11 for calving ease and 11.2 for milk.

His 2 year old, nice uddered dam, did a real nice job on her first calf and has calved again in January with her second bull calf.

EDN VICO 209Y

PG757147 EDN 209Y POLLED PUREBRED 01 APR 11

ACT	ADJ	ADJ	CSA	Expected Progeny Differences							
BW	WW	YW	CE	BW	WW	YW	MCE	MWW	MILK	SC	
96	857	1230	9.3	1.0	33.7	54.5	5.6	22.8	5.9	0.10	

Here is an eye appealing April 1 son of EDN Vico 40U, our Homo Polled calving ease bull that sired our top selling bull last year going to Camden Cattle Co.

209Y stacks up very well against the older bulls. The first things you will notice are the deep red color, heavy hair coat and easy going nature which comes with all Vico calves. EDN Vico 40 U scored 9 out of 10 for docility on his Igenity test. Don't overlook him because of his age. Testicles are developing well.

His dam is a daughter of EDN Red Nugget, a direct son of the 52C cow. His Grand Dam, a Big Sky daughter was one of Amanda's 4-H projects as a yearling. At 11 years old she is still a completely sound cornerstone of our herd that always brings in a top calf.

The Vico - Red Nugget combination always works well. Ask Doug Wilson about the two sons he bought last year.

94	844	1284	9.0	0.3	29.3	51.9	5.2	25.2	10.6	N/A	

219Y is our youngest on offer, but in my opinion this bull has a lot of potential. A loose made, easy fleshing bull with a deep quarter and flank. He moves out effortlessly and tracks perfectly on faultless feet and legs. Dog quiet and real nice haircoat. EPD's at 9.0 for C.E. and 10.6 for milk.

His dam carries the genetics of 3 top cow families, 52C, 29G and 68D. She is a moderate, low maintenance cow that is flawless. Two daughters have gone into the herd and her first son went to Byron Thomas as a top seller at our 2010 sale. She is one of the reasons that we are so high on EDN Punch daughters. Look for more Punch daughters in our black section.

His sire was purchased from Erixon Simmentals as the top selling bull at the Advantage Sale. He stems from Bob's favorite cow family. He was All Breeds Jackpot Champion at Brandon Ag. Ex. and at Saskatoon Fall Fair. He was Bull Calf Champion and Reserve Champion Bull.

Bond would be a great investment if you want growth, length and natural muscle expression. He ranks #1 for yearling weight in our pen of bulls. He offers eye appeal, disposition and a big sound foot with good depth of heel. He will cover cows and territory and sire sale topping steers and replacement quality heifers.

His Grand Dam was purchased at Porter Ranches Herd Reduction Sale. His Top Cut Dam is a large framed nice uddered cow that ranks high in our herd.

The sire EDN Sambo was used in our herd for 3 years and is now owned by Crocus Simmentals. We thought enough of him to draw a bank of semen for in herd use.

Homo Polled Test Pending

## EDN BANKROLL 120Y

PG757138 EDN 120Y POLLED PUREBRED 17 FEB 11

120Y is a favorite among our black bulls. He is a big, soggy, loose made, quiet natured bull. Real nice hair coat, good testicles and very good footed. Top 35% for CE, top 10% for YW and 25% SC.

Dam by EDN Punch is a big volume forage converter that has always conceived on her first service. She is one of those trouble free Punch daughters in our herd. Punch carries genetics from 52C and 29G cow families.

Grand Dam by Metro is still producing well at 12 years old, with perfect udder and feet. She is also the Grand Dam of 82Y – Lot 16.

We would like to reserve the right to draw semen for in herd use.

## EDN SHORTCUT 118Y

PG757137 EDN 118Y POLLED PUREBRED 15 FEB 11

Shortcut is the result of a planned mating to produce a black blaze face bull. Both sire and dam are black and blaze faced.

118Y is a stout, loose made bull that has caught the eye of many visitors. Good bone, muscle expression and capacity in this prospect. This dog quiet calf ranked 4th at weaning 3rd at yearling.

His dam is a fertile and productive 10 year old cow from the 68D family. Four daughters have been retained and a son sold to Doug Goudy.

EDN DIVIDEND 125Y

PG757139 EDN 125Y POLLED PUREBRED 19 FEB 11

Here is a calf we have had our eye on since birth. After much deliberation we have decided to offer him for sale. Built like a tank, full of meat and muscle on a moderate frame. He has huge testicles, awesome disposition and moves out well on flawless feet and legs. You need to see this bull out on cement, you can't build a more perfect foot. 125Y will pay big dividends to his new owner.

EDN Minnie 46M was another of Amanda's 4-H projects as a heifer and Champion at the local show. She has developed into an awesome trouble free cow. Last year's calf was one of the top sellers going to Oklahoma. We would like to reserve the right to draw semen for in herd use.

EDN STAR 82Y

PG757130 EDN 82Y POLLED PUREBRED 07 FEB 11

Star is one wide load in the black division. Probably the biggest topped calf in our pen and that width extends from front to back right down over his butt to his hocks. A straight black calf with a white star on his forehead.

His dam also has that white star on her face, and is an easy doing front pasture cow that has two daughters retained. His 12 year old Grand Dam, a Metro X Universe daughter, is still producing and completely sound. She is also the Grand Dam of 120Y (Lot 13).

**EDN GODFATHER 63Y**

PG757129 EDN 63Y POLLED PUREBRED 02 FEB 11

A good natured, large framed bull that will put growth and performance into his progeny. Exceptionally long but still a lot of thickness and depth of body. Outcross genetics for most herds. Again that big sound foot that I look for in a herd bull.

His dam is a bigger framed cow that will wean calves 50% - 60% of her own weight. All of her calves have been born in February. She branches from the same family that produced the \$10,000 EDN Spud 17S bull at OK Farms of Red Deer and the Chunk bull at Prairie Wind Farms. Also a Bold Impact son went to Lee & Cindy Peterson some years ago.

We would like to reserve the right to draw semen for in herd use.

**EDN DICE 43Y**

PG757126 EDN 43Y POLLED PUREBRED 26 JAN 11

Curve bending genetics here with Lucky Dice ranked in the top 3% for CE and top 2% for yearling weight. Lucky Dice semen has not been available for some time.

43Y will catch your eye in the bull pen every time with that proud herd bull presence about him. Moves out well, on big, correct feet. Nice length and good thickness across his top and down into his butt, and huge testicles. He could be the bull you have searched for. Check him out.

His 2 year old dam is a very good big ribbed and moderate frame, with nice level full quartered udder with desirable teat spacing, back to the 52C cow family. We would like to reserve the right to draw semen for in herd use.

Dam:  
EDN Sheena 9S

A mid March calf that stands right up beside the older bulls. One of my favorites, in the black division. Really good, long, smooth shouldered bull with medium bone. Another really docile, completely sound bull, that can really get out and move. Nicely balanced EPD's right across the board. You will want all the daughters for replacements.

CDP Russian has earned his spot in our bull battery with the calves he has produced, both red and black and his desirable phenotype. A son was a high seller last year to Oklahoma.

His dam could very well be our best producing Punch daughter that always looks the part. Two daughters in herd and a son to Margaret Reiling. She is also the Grand Dam of 90Y (Lot 4).

# HERTER SIMMENTALS

Travis & Debra Herter - Larry & Linda Herter  
 Box 22 - Golden Prairie, SK - S0N 0Y0  
 Travis: Ph: 306-662-5006 C: 403-878-6541  
 Larry: Ph: 306-662-3704 C: 306-662-7638

hertersimmentals.com

Welcome to the 3rd Annual Southwest Sale. We would like to start off by saying thank you to last year's bidders and especially our buyers Goehring Ranch and Spring Lake Colony.

Our goals are simple - raise moderate, easy doing cattle that excel at calving ease and press the scales come weaning. We will calve out 55 black Simmental and SimAngus this year and utilize walking herd bulls, A.I., and embryo transfer to improve the quality and consistency of our herd.

We feel Simmental is the best choice to use on your British based cow herd providing that extra boost in your calf crop.

If you have any questions on the bulls in the sale, feel free to give us a call and we encourage you to come by and see the dams and extended family to these bulls. Buying a herd sire is the biggest impact that you will have on your herd and knowing the background will help you make the right choice.

22

## TSZ TITAN 547Y

PENDING HTW 547Y POLLED PUREBRED 17 MAR 11

*Titan is a deep made, loose hided bull, with awesome hair and a gentle disposition. He's got that herd bull look and will get some attention come sale day. His dam Sheza Beauty 7N is a moderate, big volume Joker female with an ideal udder and super feet and legs. She is the most consistent producer we have ever had and believe can add value to any pedigree. We have retained every calf from 7N to date as well as three full sisters and one full brother to Titan. Two full brothers were sold last summer after our joint field day in August. We will have pictures of the dam and siblings of Titan on our website sales page for you to appraise.*

*Sire:*  
Hooks Shear Force

EZ Out is a stout, smaller framed Shearforce son off a first calf Kosmo's Pride daughter. With just a 78 lb. birth weight he weaned off at a respectable 754 lbs. adj. weaning weight. EZ OUT ranks high in calving ease and birth weight (top 1%) as well as maternal calving ease and milk. EZ OUT has adequate growth and would work great on those British based females to improve temperaments, increase muscle, maternals, and heterosis.

*Sire:*  
Kosmos Pride 8S

Innovator is our youngest bull on offer. He is moderate, thick, and stylish with an interesting pedigree. His sire was a bull we purchased from Scissor Creek Simmentals some years back and is one of the best sires we have ever used. His dam is a stylish, moderate, tidy uddered Trademark daughter going back to some top cow makers such as Powerstroke, Wally, and Houdini. With calving ease and birth weight EPDS in the top 5% and some good honest growth to go with we think this guy will be a winner. Put Innovator on your Angus cows and reap the rewards.

 Kelly's Cell: 306-297-8861  
 Tara's Cell: 306-297-8000  
 kelarafarms@hotmail.com

Welcome to the third annual Southwest Showcase bull sale. We are excited to be part of the livestock industry. With the cattle numbers being low and the demand for slaughter cows and bulls very high; we have seen better pricing for the high quality of product that our commercial customers are producing. Keeping this in mind, now is the time to replace your old herd bulls with newer genetics.

Our bulls are good, honest, practical bulls raised with the commercial buyer in mind. There is no creep in their ration, and their weaning weights are produced only by their mothers. Kelly has said more than once that "the cows better be able to do it - or we are in trouble". Due to the very wet spring we did not get the cows and calves out to pasture until late June. With this in mind, the bulls did not get weaned until October, and were only on hay until December when we introduced them to their grain ration. We realize that they might be a bit "green", but we refuse to push them to make them look good just for sale day, as these bulls have to last!

Docility, calving ease, calf vigour, weaning weights and soundness are our genetic priorities to the commercial buyer. Please feel free to give us a call. We look forward to talking to you about our program, and how these bulls will work for you!

## X-T SIMMENTALS

Don Lundberg

306-295-3843  
x-tsimmentals@explornet.com

Ryan Lundberg

306-295-7999  
ryan\_lundberg2@hotmail.com

Welcome to the third South West Showcase bull sale. Our family has lived here in the Cypress Hills since 1909 and has been raising Simmental cattle since 1971. Ryan and Julie are the fifth generation to have lived and worked on our ranch. We run a mature cow herd of 350 cows plus bred heifers. We only retain 25 bulls so the selection process starts as soon as they are born. Our cattle are selected for low maintenance and "do it on their own" traits. With cowherds getting larger and many people having off-farm jobs to help pay the bills, we realize these are the type of bulls that our commercial customers need. We sell only a small number of females every year through the Agribition and Simsational sales where many of these females have gone on to be feature cows for their new owners.

This year our bulls will be ultrasounded and that information will be available at sale time or you can contact us before the sale. Thank you to all who attended last year's sale and we hope to see you back again this year. If you have any questions about the bulls, please feel free to call Don or Ryan any time.

This pen of bulls, due to their age, were purposely held over to sell as long yearlings. Now with an extra year of age, they will go home and breed more cows with less trouble. These bulls are ready for bigger pastures where they have to really get out and hunt down the cows. These bulls were turned out on native pasture from May 1 until late October when they were brought back in to start on feed. They have been fed a light grain ration this winter as we want them to go out and work for your for years.

46

## X-T BLACK HEAVYWEIGHT 18X

PG757511 LW 18X POLLED PUREBRED 07 APR 10

This big, long bodied black bull has full goggles around both eyes. His dam is not a real big cow but she is a big producer as are all the Heavyweight daughters, who are our best young black cows. This bull will put some chrome on calves out of solid black cows.

Welcome to the 3rd Annual Southwest Showcase Bull Sale. Some years it just so happens that a lot of your best producers have bull calves. Last year was that year for us, so this year's bull sale offering is very exciting to say the least! It was such a joy to tour the pasture last summer with this set of bulls on their dams.

We think we've provided some good bulls for your appraisal at this sale, many of whom are out of AI Sires whose availability is limited in Canada. One AI Sire that you will recognize in many of our pedigrees is TCF/RCC Temptation GJ640, whose progeny have been well received across Canada, and for good reason. "Temptation" is one of those bulls that sires high performing bulls and exceptional females. We select all our AI sires based on their ability to produce both excellent females and bull calves, with a balance of calving ease and performance.

Many of the bulls have been Igenity Profiled, Polled and Color tested. To view Igenity profiles, scotals, pictures of the bulls' Dams, Sires, relatives, and more, please visit our website at [www.boundaryranch.ca](http://www.boundaryranch.ca). Give us a call or stop by anytime and we'll be happy to show you around the bull pen and our cow herd.

Thank you to Bouchard Livestock for the excellent job they do with the sales management. A big thank you to all those who have supported our program in the past. We look forward to seeing you all sale day!

## BOUNDARY TEMPTATION 9Y

PG747431 BOUN 9Y POLLED PUREBRED 03 JAN 11

*This guy is a tank plain and simple. Long as a freight train and extra wide, 9Y will definitely be adding some serious pounds to any calf crop. He was easily the highest Indexing red bull for WW, YW, ADG, and WPDA. His EPDs rank in the top 2%, 4%, & 15% for YW, WW, & MCE respectively. He's sired by the infamous "Temptation" bull who's known for his tremendous offspring and who's semen is no longer available in Canada. His Dam has produced an excellent 3/4 brother to 9Y selling to Diamond K Cattle Co. and an awesome "Silk Tassel" female who was also bred Temptation and wouldn't you know it, her heifer is right at the top of the replacement pen. 9Y has big testicles and is overall a very attractive individual; he was voted Cattleman's Choice Champion Bull at the Medicine Hat Pen Show in December. 9Y is too tempting to pass up!*

Dam:  
 Boundary Renata 3T

We really like the Red Ace calves. They come easy with moderate birth weights, but have great performance. 21Y is a powerful bull with lots of width, eye appeal and a great disposition. His Red Label dam had a fancy "Bravado" heifer calf that sold at Agribition Sale in 2009 to Tessier Simmentals. 21Y has above average BW, CE, MCE EPD's and still managed to rank 2nd of the reds for AYW & WPDA. 21Y should provide a balance of calving ease and performance.

**BOUNDARY CROCKET 68Y**

**PG747450 BOUN 68Y POLLED PUREBRED 21 JAN 11**

*I can't say enough about 68Y; he's so deep, wide, hairy, and dark red – an extremely attractive package, without even considering his dam. Reggie 110R is our resident can't miss red cow. Her first calf was a Bravado female that as a 2 yr old produced the high seller for this sale in 2010. Her 2nd calf was the high selling red bull in the 2009 "Your Choice" Bull Sale and one of the best bulls we've raised. She also has beautiful 3yr old and 2yr old females in our herd. 68Y's EPDs rank in the top 5% for WW & 15% for YW. Backed by his powerful "Crocket" AI sire and the potent "Reggie" family genetics, 68Y should be one of the great ones. Look-up this bull's brother and sisters on our website; you won't be disappointed.*

*1Y is a very smooth bull sired by the calving ease bull Bravado that has worked so well here. Bravado calves are typically born early and 1Y definitely fits the mold with a 272 day gestation. 1Y was weaned with the Angus calves so he was only getting 2.5 lbs of barley until mid-December, but now that he's with the sale bulls he's really catching up. With low EPDs and a BW of 77 lbs., 1Y should work well on heifers.*

Dam:  
 LFE Ready to Tango 609S

Here he is, the first son from Boundary Ranch to sell out of the flush cow Ready to Tango. 122Y is the youngest calf we have in the sale, but he's pretty special. Very correct in his make-up, with extra depth of rib, and tons of hair, 122Y would be an excellent addition to many herds. His EPDs rank in the top 2%, 3%, & 10% respectively for MCE, YW, & WW. He's had some high profile maternal siblings sell in the Agribition Sale, and in Lewis' Bull and Female Sales. Take a good look at this handsome fellow come sale day.

Welcome to the third annual Southwest Showcase bull sale. Another year has gone by and cattle prices once again have climbed to a higher level, with steer calves bringing over \$1,000 and commercial bred heifers pushing well over \$2,000. It's once again exciting to be in the cattle business.

Now, more than ever, quality herd bulls will bring a higher return on investment. Our bulls continue to bring moderate birth weights, volume, thickness, good hair coats, and super quiet temperaments. Some are calving ease bulls, while others will bring strong performance to your herd. If you require any further information about our sale offering, be sure to give us a call.

Thank you to our past customers, and we look forward to seeing everyone at this year's sale.

### TPP CROCUS AMARILLO 24Y

PG758809    TPP 24Y    POLLED PUREBRED    13 FEB 11

*Amarillo is a bull that we are very proud to offer at this year's Showcase sale. Dark red, loose hided, free moving with tons of muscle and hair. His mother is one of our very best cows that has a perfect udder, wide top and tons of depth. She is a daughter of the 16P cow that we have really built our red program around. We have been very happy with the consistency and quality of our Texas calves. They really have that extra muscle and power to sire those top performing calves. The Texas x Red Snapper cross makes for a very interesting combination here. Amarillo could be that standout outcross sire that everyone is searching for. We would like to reserve the right to draw 100 straws of semen for in-herd use at our expense and your convenience.*

TPP CROCUS LEGACY 14Y

PG758810 TPP 14Y POLLED PUREBRED 05 FEB 11

This bull is absolutely full of meat and muscle. Full through the flank, deep through the heart and a huge hip that carries all the way down. When you get in behind him he has so much width and spring of rib. Backed by the 16P cow family, making him a 3/4 brother to Amarillo 24Y. A maternal brother sold in last year's sale to Pat Sherle, Oklahoma. This calf is very hard to fault and has a very bright future. Don't miss out on this one.

KALE CROCUS CHALLENGER

PG758850 KALE 13Y POLLED PUREBRED 03 FEB 11

Have a look at this exciting herdsire prospect. Challenger has all the right tools to make a big impact. Deep ribbed, long bodied, heavy muscled and a good set of testicles. He is backed by a very strong mother cow that produced one of our feature bulls in last year's sale. His outcross pedigree and strong phenotype will work for many producers. This bull has a lot of things going for him, and will pass this on to his calves.

TPP CROCUS PEDRO 9Y

PG758811 TPP 9Y POLLED PUREBRED 29 JAN 11

This calf will draw some attention on sale day. He is out of a black baldie first calf heifer that did a tremendous job raising him. Shear Force sons are getting hard to find and are sought after because of his outstanding calving ease and strong daughters. If you are looking to add some extra thickness to your calves with that chrome on the face, take a look here.

Legion is a growthy, long bodied black bull that will add power to your black cows. This is our first set of Sambo calves and they look great. The sons are a very consistent, soggy bunch and the daughters look very impressive. We can't wait to get them into production. Sambo himself has a ton of rib, great big feet and is so free moving. If you need to add some extra punch to your black calves, seriously consider Legion.

**74**

**TPP CROCUS ENERGIZER 8Y**

**PG758807      TPP 8Y      POLLED PUREBRED      29 JAN 11**

*This bull looks great from every angle. Lots of width over the top, a strong hip and a great coat of hair. He has looked good from a very young age. His sire Red Bull is a new Freedom son on the market that has produced some top offspring in many operations. Look for him to moderate frame, add muscle and produce a great set of females.*
