Welcome from Bouchard Livestock

While touring the bull pens of the Southwest Showcase consignors we have been very impressed with the quality and development of the bulls on offer. Overall, top to bottom, as strong a group as these folks have ever offered. Within the respective animals on offer there are bulls to fit into lead-off purebred programs as well as a great offering of beef bulls that are candidates to work in front-end commercial herds. The Southwest Showcase has become a gathering spot to source herdbulls and a sale with great timing for many folks, allowing a bit more time for travel as there isn't a sale every day later in March.

Call any of the consignors to discuss this quality group of potential herdbulls. These breeders will definitely do their best to accommodate your herdsire needs and steer you in the right direction. If any of us at Bouchard Livestock can be of assistance please give us a call, we will do our best to be of service. Call any of our cell phones should you be unable to attend and require representation sale day. Hope to visit with you in Swift Current.

MEAL - Please join us for a great lunch at noon.

SIGHT UNSEEN PURCHASE PROGRAM

If you are unable to attend the sale but are interested in bulls, give the consignors a call and they will personally go over the bulls and your program and recommend bulls that would meet your needs and refer you to one of the sale staff who will represent your needs in a professional and confidential manner.

100% GUARANTEE

All bulls are guaranteed to be satisfactory breeders in accordance with CSA guidelines. Should a problem occur barring physical injury or mismanagement, a bull of equal value will be provided or a credit will be issued towards the purchase of another bull. We guarantee you will have a bull to service your cows.

HEALTH AND FERTILITY

All bulls will have a scrotal measurement and a vet examination done prior to the sale. All bulls over 12 months of age will also be semen tested; any bulls under 12 months of age will return to the seller's farm to be tested after the sale. These bulls will be delivered once a semen test has been passed. All bulls have been treated with Ivomec and have current vaccinations. Contact the breeder for specific herd health programs.

IN-HERD USE SEMEN RIGHTS

The Southwest Showcase consignors reserve the right to collect semen on any bull in the sale for their in-herd use only. Any questions please contact the consignors.

CATALOGUE PRODUCTION

Freelance Photo-Graphics.....403.862.8196

BULL DEVELOPMENT & DELIVERY

The Southwest Showcase consignors will keep bulls free of charge until May 1st, 2016. Buyers need to insure the bulls while being cared for by the consignors.

Option A: Bulls can be picked up at Heartland Livestock sale day and a \$50 discount will be deducted from the sale price

Option B: At the buyer's option and risk, the bulls can be returned to the consignor's farm and picked up anytime at the buyer's convenience.

Option C: Please make arrangements with the consignor if trucking is required.

EPD EXPLANATION

EPDs are "Expected Progeny Differences". They are a useful tool in selection. EPDs incorporate the individual animal with its averaged ancestry performance. EPDs do not compare across cattle breeds, they are individually based per breed. EPDs indicate a probable variance above or below breed average for that trait for a given bull's progeny. Use them for guidance in the direction you want your herd to go.

Welcome to the 7th Annual Southwest Showcase Bull Sale. We would like to say a big thank you to all our bidders and buyers over the years. We feel very fortunate to be working with such a progressive and reputable group of breeders, sales management, and customers.

The cattle industry continues to be in a tremendous state, and looks to remain strong for years to come. No matter where the market is, the same principle holds true. Top quality cattle bring a premium over their counterparts. The easiest way to improve your calf crop is to invest in the best quality bulls available, and this decision will pay for itself over and over down the road.

We are excited to offer you a set of bulls that we feel display the characteristics that we strive to produce. Deep-sided, wide-topped, easy keeping bulls that are structurally sound with great hair and quiet dispositions. We believe these qualities come from the strict criteria that we have always had for our cow herd of sound feet and leg structure, udder quality, and dispositions. We feel if you analyze our bull pen, these qualities are evident. They are developed with the future in mind. The weaning weights you see are with no creep feeding, so they are a good indication of their genetic potential.

If you require any further information on the bulls, be sure to give us a call. The bulls are available for viewing any time and we look forward to seeing everyone at this year's sale.

A big time herd bull prospect that we are very proud to offer. Huge-hipped, deep-sided, long-bodied and loose-made are all words to describe this outstanding individual. He demonstrates explosive rib shape, width over the top, is very free moving and stands on a wide base. A bull that ties it all together, both in genetics and phenotype. We are very impressed with these Bootlegger calves and used him heavily again last spring. This bull's dam is a model female with a picture perfect udder and has been an excellent producer in her young career. This bull has unlimited potential and will have a big impact in the future.

LTS CROCUS AMARILLO 36C

PG1163039 LTS 36C POLLED 13 Feb 2015

We think this Amarillo son has herd bull written all over him. Long-bodied, loose hided, sound-structured and very fluid in his movement. He really has a strong presence to him that draws in your attention when you enter the pen. He has very strong performance EPD's being in the top 15% for both WW and YW and is sure to add pounds to his calf crop the same way that his sire has done for us. The Amarillo sons are so consistent in type and kind, and were very well received in last year's sale. This is the type of bull that will really be noticed on sale day, and more importantly his calves will really stand out down the road.

LTS CROCUS ALPINE 8C

APPLIED LTS 8C POLLED 22 Jan 2015

If your next herd sire needs to have a proven and highly sought after cow family behind him, take a look here. He is an ET son of the Jacey 79W cow, who is a full sister to the mother of the great Captain Morgan bull. A full sibling to this bull sold in the 2015 Agribition sale as one of the high selling bred heifers for \$14,000, which speaks to the quality and potential that this bull has. He has a ton of eye appeal, awesome hair, thickness throughout and that great dark red colour. Both on paper and in person he has a very promising future, take advantage of the opportunity!

A High Voltage son out of a cow that has now put five bulls through this sale. We can always count on her to bring home a top calf, no matter what bull she is bred to. We believe this consistency will be passed on through this son, who has all the tools to make an impact on someone's herd. The fact that he is in the top 10% for CE, top 15% for BW and top 15% for MCE just adds to the package.

Here is another great son of Amarillo. He boasts a strong set of EPD's, being in the top 20% CE, 35% BW, 35% WW, 25% YW and 20% MCE. The Amarillo calves have been everything we could have hoped for. The daughters are easy fleshing and broody, with ideal udders. The sons all have that same stout look about them from a very young age when they're only a few weeks old, and mature into the type of bulls we want to raise for our bull customers. This bull fits that exact mold and will be a great asset for his new owner.

82	715	-	6.8	1.8	65.2	96.2	13.3	55.2	22.6	29.3

A very complete, dark red, strong-topped bull here with just an 82lb birth weight. He is a full brother by pedigree to the Lot 1 bull, as they are both sired by Bootlegger and out of full sisters. His dam is a moderate-framed, dark red cow with lots of rib and a perfect udder. His smooth front end, light birth weight and thickness throughout make him an appealing choice.

7

LTS CROCUS FORCE 26C

PG1163041 LTS 26C POLLED 4 Feb 2015

A real eye catching, calving ease prospect that is very clean through the shoulder, deep through the middle, and full through the hindquarter. It is rare to find a bull with such an attractive, smooth front end, yet very thick and stout in his make up. He ranks in the top 4% of the breed for CE and top 15% of the breed for BW EPD's, along with having a moderate birth weight. His mother is a first calf heifer that did a great job here, and the whole cow family has ideal udders. We hold our first calf heifers to the same standards as the mature cows, and she certainly proved herself here.

TPP CROCUS AMARILLO 14C

PG1163028 TPP 14C POLLED 27 Jan 2015

A real wide-topped, big-footed bull that is deep through the middle and has excellent testicle development. He travels very freely, has outstanding performance numbers and really has that herd bull look to him. He will sire big time performance calves, while still maintaining moderate birth weights. He ranks in the top 10% of the breed for both CE and BW EPD's, while weaning off at over 800lbs. A true curve bender! His dam is a super deep-bodied, heavy-milking Bravado daughter that is an ideal type of female.

POLLED

20 Jan 2015

This was one of our favourite bulls all summer in the pasture and continues to impress us each day. He is an early maturing, free moving bull, with a lot of natural thickness and testicle, from a big volume Red Cloud daughter. We love the soggy, easy fleshing look that the Amarillo calves have, and they are excellent-footed cattle. We calved out the first set of Amarillo daughters this year and they are broody females that are setting up very nice udders. He seems to be leaving both strong bulls and females, and we can already see the strong influence he is having.

LTS CROCUS LOTTO 7C

BPG1163040 LTS 7C POLLED 22 Jan 2015

This bull is impressive from every angle. So deep through the middle, full through the flank and a huge hip that carries all the way down. When you get in behind him he has so much width and spring of rib. With all his muscling, he is still very clean through the front end and sheath. He is structurally sound and moves out with a good full stride. He is very proud fronted and has a real presence about him that draws your attention to him again and again. His dam is a very promising young cow with a different twist in pedigree. We are very excited about this bull's future.

85	749	-	3.9	4.2	66.1	97.8	11.9	58.4	25.3	33.9

This is a bull that is right in many ways. Smooth through the front end, deep-ribbed, flat-topped, well-balanced and a moderate birth weight. His dam is one of our top cows with four daughters retained in our herd, and she is also the grand dam of the Lot 11 bull. When you look back in the pedigree and see the maternal great 600U, it is no wonder why this cow is such a great producer. This is a very eye appealing, well-balanced bull with a ton of maternal power behind him.

A real eye catching blaze face bull that is well-balanced, smooth through the front end and has a lot of style. His dam is a real deep-bodied, big-ribbed, blaze face cow that always has a calf at the top of the pen, whether it's a bull or heifer. These blaze face cattle are becoming more popular all the time, and the order buyers fight over the calves knowing there is likely the Simmental influence in them. Don't miss out on this one.

LTS CROCUS OBSESSION 29C

BPG1163038 LTS 29C POLLED 8 Feb 2015

We love the length, hair, hip and sound structure that this bull demonstrates. His pedigree is stacked with the likes of Temptation, Power Surge and Joker who have been some of the most influential bulls in the breed. His dam came from McMillen Ranching out of the Shades of the Prairies sale as a high selling bred heifer for \$13,000 a few years back. She has another awesome bull calf beside her again this year that we are very excited about. He features a very strong set of EPD's being in the top 25% WW, 10% YW, 10% MWW and 35% Milk. Plan to keep all of the daughters from this bull, as they will make tremendous cows.

Here is a bull that will demand your attention. Long-bodied, big-hipped, sound-structured with a ton of width over the top and great hair. His pedigree contains highly sought after genetics being an ET son of the Jacey 79W cow, who is a full sister to the mother of the record setting Captain Morgan bull. A full sibling to this bull sold in the 2015 Agribition sale as one of the high selling bred heifers for \$14,000. There is a ton of high profile cows in this bull's pedigree and it will surely yield great results for his new owner.

Welcome to our 7th Southwest Showcase Bull Sale. We would like to express our appreciation to all buyers and bidders of our bulls, past and present. We have worked to breed hardy trouble free cattle that work in our environment and believe very strongly in building around cow families that have proven they are superior.

The bulls on offer are the result of 45 years of breeding and were selected from 140 born in 2015. We present them the way we would like to buy them – not overfed, no feet trimmed, semen tested and ready to breed cows. We stand behind our bulls, so if any problems arise please do not hesitate to contact us. We will have backup bulls available.

We welcome your calls. The bulls are available at the ranch for viewing at any time.

- Dean, Caroline, Amanda & Raeann Neitz

Here is Carlo, the King of our bull pen and one we are very proud to offer. He is long, deep, loose-made and thick in all the right places. Very structurally sound with a leg on every corner and big correct feet. Deep red in color, very, very docile and good testicular development adds to the total package. His dam is a big, powerful, easy fleshing cow with an awesome udder. She traces back to the 68D cow family. HWY 5 Tony has done everything right here and is pictured at 6 years of age after servicing a large group of cows. Daughters of HWY 5 Tony are quickly becoming some of our top producers and only because the number of them is building up in the herd is Carlo being offered.

19 **EDN TONY 164C** PG1156113 EDN 164C POLLED 12 Mar 2015

He is a pen favorite. 164C is typical of HWY 5 Tony sons – moderate, well-muscled, structurally sound, good-footed and docile with big testicles. Imagine a pen of thick hairy steers sired by him. With HWY 5 Tony, Red Label and Bodybuilder in the pedigree you can expect the heifer calves to be keepers. His dam is a very productive, easy fleshing, trouble free cow who has a son working at Birch Creek Ranch and a really good daughter at Diamond K. Her 2016 model is a heifer calf that will remain in our herd.

Once again the same characteristics in a goggle eyed, 3/8 Fleckvieh Tony son. He is an April calf that was the top performing calf at weaning. He should work well on cows of any color to add performance, style, milk and a blaze face. He has been DNA tested Homo Polled and diluter free which means all his calves will be polled and there will be no gray calves from black cows. His young dam, 99Z, is eye catching, clean-fronted and fully pigmented with a really good udder. She has earned her spot near the top with her first two productions. Last year her calf was the first bull to sell from our private treaty pen.

Homozygous Polled - NonDiluter
 We would like to retain semen for in herd use.

Add some length, bone, hair & pounds to your calves with 124C. With his nice, long, easy stride he will cover your pasture and comes equipped with the tool box to get the job done. I believe a long-bodied bull can be 10lbs heavier at birth without causing calving trouble. His dam is of moderate frame size and so completely sound, productive and fertile. I wish I had 100 just like her. All four of her daughters are in the herd and a son has gone to Oklahoma, USA.

Here is a moderate-sized, loose-hided, deep-sided calf. He is very structurally correct, with a nice head and smooth shoulders for calving ease, should be strong in maternal traits. Use him to produce functional low maintenance replacement heifers while keeping mature size in check. His Ranch Hand dam is an absolute tank of a cow on a moderate frame. Very good-footed and has a really nice udder. She traces back to our old 52C Red Bear cow that had a huge influence on our herd and was still completely sound at 16 years of age.

 x-tsimmentals@sasktel.net

Thank you to all the bidders and buyers from our previous 6 sales. We really appreciate meeting and visiting with new buyers as well as repeat customers. We strive to produce and sell you the best bulls we can. Our bulls are hand fed a bull-growing ration along with good grass hay. We try to have the bull gain 100lbs per month. Pushing them any harder than that affects their longevity and fertility. Most of our bulls will be less than 12 months of age at sale time so we will take the bulls home at our cost until they are semen tested. Our bulls are very fertile; we have had many of our bulls breeding cows at 12 months of age. After they pass their semen test, we will deliver them to your yard at our cost anywhere in the three prairie provinces.

If you see two young holy terrors at the sale they are probably our two grandsons Reece and Gavin Lacey, ages 5 and 3. They might be wild but they are scared sh**less of the Delorme sisters!

When we saw RED ZONE before Barry's bull sale, we immediately knew we were going to take a run at owning him. However, we didn't think it would take \$59,000, but it turned out to be a great investment. Horizon, his sire, has revolutionized the Red Simmental with the type of cattle he produces. What really sold us on RED ZONE was his fantastic black dam, Black Jewel 6S. What a beautiful Powerline x Hook's Red Quorum daughter. Great sires come from great cows, without exception!

It was a great day when we bought TRACKER from MRL. His dam has gone on to be an elite cow at McMillen's where her calves top their bull sale. Nothing more can be said about Predator that hasn't been said a thousand times before. Tracker is a very easy calving bull and once his progeny hit the ground they take off and develop into elite individuals. His first bull calf sold last year in this sale to Sunny Valley for \$21,000. Once again thank you to the Libke family. His first daughter to sell sold at Simmsational 2015 for \$20,500 to LC Ranch, Craig and Cody Hogg to enter their embryo program as an elite donor. Daughters sold to date have averaged \$14,700.

X-T New Herdsires - watch for progeny in 2017

IPU ONE IN A MILLION 71B

Big time performance sire out of an elite donor cow. We will have his first calves this Spring and are very excited to see them develop.

IPU CODE RED 53Y

CODE RED delivers a boat load of performance in a big, dark red, and very attractive package. Anyone who has ever seen him has been very impressed. We think he will work very well on our highly maternal cow herd.

X-T RED CRUSH 5C

PG1151255

LW 5C

POLLED

5 Mar 2015

This is a bull that anyone could use – he is the whole package. He's wide, deep, big-testicled and very attractive. All the calves sired by the high selling Red Zone bull are so similar with their moderate birth weights and then going on to have lots of performance. The daughters are just as good as the bull calves and we can't wait to get them into production. The dam, 61X, is a cow who when you see her you just love her. She is a cherry red, deep-bodied, big cow, and a super heavy milker. CRUSH was shown at Agribition where he was 3rd in class. Purebred breeders need to have a serious look at this calf; we think he is as good as any we have raised.

39C has as much top, depth and capacity as any bull in the pen. The Red Zone cattle are so consistent. His Walk The Line dam is an excellent young black cow with a typical Walk The Line perfect udder. They are all great producers with nice tight udders and very small teats. If you are wondering why we keep writing about females in a bull sale catalogue, the answer is that we are focused very strongly on maternal traits in our herd. We feel that at the end of the day if you have a cow herd of easy calving, top producing and easy fleshing cows, then you are the cattle business for the long haul.

Here is a calf that anyone who wants a big time herd bull will want to take a serious look at! Sired by Tracker, who sired our high selling bull last year to Sunny Valley. Tracker-sired cattle of both sexes are most definitely the right kind. The bulls are deep-bodied, thick-topped and masculine, while the females are round-bodied with a big top and are so feminine-fronted. The dam, X-T Black Heroine 262U, is a cow that is right at the top end of our black cows. She has three daughters retained in our herd plus a daughter through the 2014 Agribition sale as one of the high selling open heifers to Hannah Simmentals. Good milk numbers on this calf out of a super cow family. Anyone looking for an elite black bull needs to take a serious look at 26C!

The youngest calf in our offering and one of the biggest. Remember, most of our bulls are only 11 months old at sale time so are considerably younger. They change real fast from 12 to 13 months. NIGHT WALKER is sire by our superb female producer, Walk The Line, and out of another Heavyweight daughter who is also the grand dam of the Terminator 76C bull in this sale. There is a reason a lot of these same cow families keep showing up in the pedigrees and that is because they are the best we have to offer.

Homozygous Black

This bull is long, has a big wide top with spring of rib and a big loin. Once again out of a good Shear Force cow; they always seem to produce the good ones. His sire is also a superb female producer so we believe the maternal power in this bull is extraordinary. He has a great Calving Ease of 9.9 and a big 25.8 Milk EPD. You will want to collect the daughters!

19C is the first calf out of an excellent heifer who did a good job on her first calf under dry, difficult conditions. They didn't see much green grass until we had some rain in September and it finally greened up a little. This bull is a smaller-framed calf with lots of loin and good muscling in his hind quarter. Lots of length in this calf. Also a good Milk EPD of 25.4

Here is a long-spined calf who has a heavy-muscled quarter and a big wide top. This is reflected in his Carcass EPD number where his Rib Eye Area EPD is in the top 4% of the breed. Once again out of an excellent first calf Justice heifer. This is a good-numbered bull all the way through with average Calving, above average Yearling, a real good Milk EPD and huge Carcass Merit. This is a bull that could improve a lot of cow herds in a number of areas.

Ph: 306-299-2006 • www.boundaryranch.ca
Sarah's Cell: 306-299-7779 • Darby's Cell: 306-662-7993

Welcome to the 7th Annual Southwest Showcase Bull Sale. We are very excited about the potential of the group of bulls we have on offer this year and what they might accomplish for our customers.

We were honored to receive the nod for Champion Pen of Bulls at the Medicine Hat Pen Show last December, against 33 incredible pens of bulls. The members of that pen of bulls will all sell at this sale. We have also decided to bring a couple of really good crossbred bulls to the sale for the first time. Our black bulls are a little younger than the reds this year, but overall, the group is very functional, and there should be bulls to fit most cattlemen's needs.

We never buy a bull without seeing his dam first, and she better be good, or the bull isn't coming home with us. Cows are everything to us, and they have to be very functional because we don't have the time (or barn!) to mess around with dopey calves or bad-uddered cows. We would be happy to show you around the ranch, but if you can't come in person, be sure to check out our website www.boundaryranch.ca. All the most up-to-date information is available on the website, including videos, weights and scrotals, and every bull's dam and sire are pictured, as well as many siblings.

Thank you to Bouchard Livestock for the excellent job they do managing the sale. Thanks to all the bidders and buyers who have supported our program in the past. We hope to see you all sale day.

BOUNDARY FULL THROTTLE 59C

BPG1139579 BOUN 59C POLLED 15 Jan 2015

59C is a feature for sure. So deep, wide, long, hairy, and very correct in his make-up. Not only is he easy on the eyes, his dam was a donor for Springcreek and Sunrise Simmentals where she has produced some great females. We will be flushing her ourselves this spring. Her first progeny here have not disappointed - a perfect-uddered two year old Captain Morgan daughter and Full Throttle 59C. At 11 years old, Linne still has a great udder and is a moderate-framed powerhouse. 59C's sire, Full Throttle, has worked very well for us. His bull calves are powerful and attractive, daughters have ideal phenotype with good level udders and small teats. 59C should sire a great balance of performance and maternal traits in his progeny.

Here's a blaze faced Combustible son with not a lick of white anywhere else. He is wide and long, with lots of muscle. His dam is a clean-made, good-uddered Upgrade daughter from the very strong "Storm" cow family. His Grandam 53W also produced high selling sons selling to Deeg Simmentals and Jerred Henderson. He had the second highest AWW & AYW of all the black bulls, and EPDs in the top 25% CE, 20% WW, 15% YW. Big time performance bull in an attractive package.

Homozygous Polled - Homozygous Black by Parentage

55 **BOUNDARY COMBUSTIBLE 207C** BPG1139602 BOUN 207C POLLED 17 Feb 2015

Here is a showy, blazed face Combustible calf that we had on display at the MHPS. He is deep-bodied, big-hipped, smooth, and clean in his front-end. His dam is a powerful, good-uddered Walk The Line daughter. We liked 207C a lot at a very young age, so much in fact, his dam was bred back the same way last spring. 44Z's maternal sister is Renata 3T, a cow that entered our flush program last spring and had two daughters selected for Agribition sales over the years. 207C had the highest AWW and AYW of the black bulls and EPDs that reflect that, top 20% WW & 15%YW. This bull is also incredibly docile – our girls pet him all summer. Great phenotype, cow family, and numbers on this guy, and that coveted blazed face. Don't pass him up!

BPG1139568

BOUN 32C

POLLED

11 Jan 2015

It's pretty hard to find a bull with 32C's calving ease numbers and awesome phenotype. With his massive hip and width, this moderate-framed "Rampage" son attracted a lot of attention at the stall at CWA and MHPS. He had an 85lb BW, a 278 day gestation, and EPDs in the top 5% & 15% for CE & BW, but also the highest ADG from WW to YW, so he still has some performance. His dam was always our favorite black bred and she sure didn't disappoint with her first calf! We liked her so much, her dam was bred back the same way and had another very good daughter with a great udder. She has another sister with a son in the sale Lot 59. 32C hails from the amazing Sarah cow family which has produced numerous high selling bulls and lead-off heifer calves in the past few years. 32C is a pretty cool calf that could produce wicked crossbreds or purebred calves.

BOUNDARY RED ENTICER 143C

PG1139595 BOUN 143C POLLED 28 Jan 2015

We truly love our Red Enticer calves. It's so difficult to find a bull that is capable of producing both top-end sons and daughters, but Red Enticer really hit the mark here. 143C is definitely a feature bull. We seriously considered keeping this guy for ourselves. He is so wide, and naturally thick, with great muscle but is also smooth-made and eye catching. He comes from the Abricot family, which has been a bull producing factory. There is huge performance on both sides of 143C pedigree, and it shows as he had the second highest AWW & AYW of the red bulls, second only to his paternal brother. His EPDs are in the top 15%WW, 5%YW, 25%MCE. His dam is another moderate-framed Walk The Line daughter with a good udder. Her full sister produced one of our top replacements as a two year old. To top it off, he has a great disposition.

This bull is a freight train. He is as strong-topped and long-bodied as they come, packed chock full of meat and muscle. His dam is a deep-bodied, moderate-framed "Gunner" daughter with lots of milk. Two sisters to Tumbler 834U have sons in this sale Lots 64 & 67. 834U had a son in our show string a few years ago that sold to Trailnorth Ranch, another son to Kristine Scheller & Roxanne White in last year's sale. She also has an excellent Walk The Line three year old that produced the "High Voltage" heifer we sold at Simmsational to Crossroads. 834U always has a great one at side but really out-did herself on 82C; there wasn't a lot of difference in size between him and his momma at weaning. 82C had the highest AWW, AYW & WPDA of all the red bulls. He ranked in the top 30% CE, 20% WW, 10% YW, and 15% MCE. If you're looking for a powerful bull backed by a great cow, 82C might be the one for you.

35C is a deep-bodied, smooth-made "Identity" son that has a good disposition. His dam is a balanced "King Arthur" daughter with lots of milk. His granddam is an ultra feminine "Boomer" daughter that also has tons of milk. We showed 142W as a calf at Agribition where she did well.

Royal Red 105C is a calf with tons of hair and a good top. His dam is the matriarch to our Heidi cow family and is also the great granddam to Lot 65. 725T is a deep, wide, broody, blazed face "Red Label" cow. She had a son that we showed sell to Golden Rock Acres in the 2014 SWS Bull Sale and has a couple daughters in herd. 105C is a very correct calf that could work in a lot of places.

Heterozygous Polled

67 **BOUNDARY ROYAL RED 6C** PG1139567 BOUN 6C POLLED 5 Jan 2015

Sale Feature. 6C liver red, smooth-made, deep-bodied, and overall just impressive. He was a member of the Champion Pen of Bulls at the MHPS in December and his dam was Champion Cow with Bull Calf 6C at side at the Ranchmen's Pen Show last fall. She was also Reserve Champion Cow with Bull Calf in 2013 with Identity 11A, another feature son selling to Golden Rock Acres. Tumbler 15X is not only clearly a beautiful cow but a great producer, with two lead-off bulls under her belt, and a really nice two-year-old that follows her phenotype very closely. The Tumbler cow family as a whole probably has the best udder conformation on the place and the matriarch to the family is still in production at 11 years old with a flawless udder. 6C himself had a moderate 87lb birth weight but also has above average performance.

Member Champion Pen of Bull MHPS. This guy has always been a favorite. He is deep-bodied, loose-made, and big-hipped with lots of hair. His dam, 623S, has been an unreal producer with high selling sons going to Diamond K, Robert Petek, Prairie Wind, Stoughtons, and City View. She also has a couple daughters in herd that aren't too hard to find. 623S will be entering our flush program this spring.

Another docile "Crosby" son, this one out of the great Nikki cow we purchased from Sunny Valley, out of the Agribition sale, as a bred, where she was one of the high sellers. She has turned into an ideal cow – moderate, but powerful, wide and deep-bodied. 89C himself has his dam's depth of body and dark red coat color. He also has a lot of hair. Lots of maternal bred into this fellow.

A direct son of the backbone of our red program, Reggie 110R who entered our flush program last spring. At 11 years old, "old Reggie" still has an udder to drool over, perfect feet, and overall an ideal phenotype. She's had many high selling sons over the years but her legacy is definitely her daughters (daughters with sons in the sale Lots 71 & 72. 161C is a dark red, super-balanced, Crosby son, that is very correct in his make-up.

126C is very long and wide, with lots of muscle that carries down and big time performance. He is also extremely docile, just like his momma. His dam, 8T, is a heavy-milking, powerful "Bravado" daughter that is super long and deep-bodied with a big hip. She is a direct daughter to Reggie 110R who is a donor for us. 126C has an incredible EPD profile, ranking in the top 35% or better for all major traits. He ranked second of the reds for Yearling ADG & 3rd WPDA.

Another wide and long-bodied, big performance "Authority" son with great hair. His dam is a powerful "Red Baron" daughter out of Reggie 110R, one of our donors who has a son that sells Lot 70. 77W also has a sister with a son in the sale Lot 71. 101C was one of the top ranked red bulls for performance and also has EPDs that rank top 20%WW and 15%YW.

Homozygous Polled

73 **BOUNDARY AUTHORITY 4C** PG1139566 BOUN 4C POLLED 4 Jan 2015

Sale Feature. 4C is exceptionally wide, long, has lots of volume, is dark red, and is clean-made. He has herd bull written all over him. 4C was a member of our Champion Pen of Bulls at the MHPS last fall. His dam is a powerful "Top Gun" female that at 8 years old, still has a good level udder and great feet. She has two very good "Red Bull" daughters in our herd that also have the type of udder that will last forever. One of them had a 3/4 sister to 4C, which will be one of our top replacements this year. 840U has sons working for Mike Winnichyn and Dale Kuzio. Another son was a member of our pen of bulls at MHPS in 2014. 4C was one of the top performing red bulls and has EPDs in the top 35% CE, 10% WW and 10% YW. We really like the "Authority" calves we've seen. Semen in Canada is limited, so get your hands on one while you can!

Win a \$2,000 Sale Credit

Purchase a bull from any current Saskatchewan member and the registration papers are transferred, your name is entered to win a chance for a \$2,000 sale credit! The draw will be made at the SSA's Annual General Meeting in July and the lucky winner will have one year to use the credit at any public auction or private sale on bulls or females purchased from any current SSA member.

Sale Terms & Conditions

The terms of the sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after settlement is made. Bouchard Livestock Ltd reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should the purchaser fail to settle for his purchase, Bouchard Livestock Ltd reserves full power to resell the animal to the best advantage, either publicly or privately, without further notice. Any loss arising from such resale, together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. The owners, Bouchard Livestock Ltd. and sale staff have the right to refuse bids from anyone who has a previous record of default in payment and/or who has not made prior credit arrangements prior to the sale with the owners and/or Sale Management.

BID - Every animal consigned to the sale must be sold by auction. No by-bidding will be permitted. Each animal will be sold to the highest bidder.

DISPUTES - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold.

ANNOUNCEMENTS from the auction block will take precedence over printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY - The proper Registration of Recordation paper, as the case may be, will be duly transferred and furnished to the buyer for each animal after settlement has been made.

SHIPPING - Assistance will be given in making shipment after the sale, but Sale Management or Seller assumes no risk. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instruction when making settlement.

GUARANTEE - All animals will carry standard breeding guarantee as specified by the applicable Canadian breed Association. At no time shall the seller's liability exceed the purchased price of the animal.

EXCEPTION TO GUARANTEE - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void. In the cases of bulls, they are guaranteed to breed naturally according to applicable Canadian breed Association guarantee, but no guarantee is given that semen from any bull will freeze.

HEALTH - It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Bouchard Livestock Ltd assumes no responsibility for the health status of any animal in the sale.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sale Management, auctioneer, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS - The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and the terms and conditions of this sale do not cover obligations of the two parties connected thereto.

BOUCHARD LIVESTOCK LTD IS AGENT ONLY - It is clearly understood that Bouchard Livestock Ltd acts only as agent between buyer and seller and is not in any way responsible for any failure by either party to live up to his or her obligations. Bouchard Livestock Ltd does not assume any financial obligations to collect or enforce collection of monies by either parties, and in exceptional case, any legal action will be between buyer and seller. Bouchard Livestock Ltd has no ownership of the facility and assumes no responsibility for the operation of said facility.
