SIMMENTAL BULL SALE

Monday, March 26, 2018
Heartland Livestock Swift Current, Swift Current, SK

SWS SOUTHWEST SHOWCASE BULL SALE

WELCOME FROM BOUCHARD LIVESTOCK

Welcome to the Southwest Showcase Annual Bull Sale. I just finished touring through the bulls in the Showcase sale last night and as always there will be herdbulls for front end commercial producers and the front end purebred producers as well. But undoubtedly this will be the strongest overall offering these folks have ever brought to town. The consignors do a remarkable job of utilizing some of the top AI sires in the industry. Each operation has also sourced herdbulls with recognizable and proven pedigrees throughout the Simmental industry. I urge you to make contact with the producers involved and discuss your needs ahead of time. The Bouchard Livestock people will be at the Heartland yards to assist you all weekend as well. All of us involved look forward to visiting with you on March 26th in Swift Current. Please call us or the consignors ahead of time if you have any questions. Plan to attend one of the premier spring events in the Simmental breed. Of course, we will be available to represent your needs if you are unable to be in the stands.

LUNCH

Please join us for a great lunch at noon.

SIGHT UNSEEN PURCHASE PROGRAM

If you are unable to attend the sale but are interested in bulls, give the consignors a call and they will personally go over the bulls and your program and recommend bulls that would meet your needs and refer you to one of the sale staff who will represent your needs in a professional and confidential manner.

100% GUARANTEE

All bulls are guaranteed to be satisfactory breeders in accordance with CSA guidelines. Should a problem occur barring physical injury or mismanagement, a bull of equal value will be provided or a credit will be issued towards the purchase of another bull. We guarantee you will have a bull to service your cows.

HEALTH AND FERTILITY

All bulls will have a scrotal measurement and a vet examination done prior to the sale. All bulls over 12 months of age will also be semen tested; any bulls under 12 months of age will return to the seller's farm to be tested after the sale. These bulls will be delivered once a semen test has been passed. All bulls have been treated with Ivomec and have current vaccinations. Contact the breeder for specific herd health programs.

IN-HERD USE SEMEN RIGHTS

The Southwest Showcase consignors reserve the right to collect semen on any bull in the sale for their in-herd use only. Any questions please contact the consignors.

BULL DEVELOPMENT & DELIVERY

The Southwest Showcase consignors will keep bulls free of charge until May 1st, 2018. Buyers need to insure the bulls while being cared for by the consignors.

Option A

Bulls can be picked up at Heartland Livestock sale day and a \$50 discount will be deducted from the sale price

Option B

At the buyer's option and risk, the bulls can be returned to the consignor's farm and picked up anytime at the buyer's convenience.

Option C

Please make arrangements with the consignor if trucking is required.

EPD EXPLANATION

EPDs are "Expected Progeny Differences". They are a useful tool in selection. EPDs incorporate the individual animal with its averaged ancestry performance. EPDs do not compare across cattle breeds, they are individually based per breed. EPDs indicate a probable variance above or below breed average for that trait for a given bull's progeny. Use them for guidance in the direction you want your herd to go.

CSA Average Spring EPDs

CROCUS SIMMENTALS

Welcome to the 9th annual Southwest Showcase Bull Sale. We would like to express our appreciation to all of our bidders and buyers over the years. We feel very fortunate to be working with such a progressive and reputable group of breeders, sales management, and customers.

We are excited to offer you a set of bulls that we feel display the qualities that we strive to produce. Deep sided, wide topped, easy keeping bulls that are structurally sound with great hair and quiet dispositions. We believe these qualities come from the strict criteria that we have always had for our cow herd of sound feet and leg structure, udder quality, and dispositions. We feel that if you analyze our bull pen, these qualities are evident. They are developed with the future in mind. The weaning weights you see are with no creep feeding, so they are good indication of their genetic potential. They are developed on a moderate energy ration to ensure soundness and longevity.

If you require any further information about the bulls, be sure to give us a call. The bulls are available for viewing any time and we look forward to seeing everyone at this year's sale.

1 TPP CROCUS SENTINEL 10E

Here is one of the most complete and powerful bulls we have ever offered. Tremendous thickness throughout, dark red, tons of hair with a big time presence and look. This bull is built for the times and has that same attraction that his sire Sentinel had when we purchased him at the Bull Spectrum sale as a high seller for \$32,000. We are thrilled with the first calf crop from Sentinel and this son is exactly what we had envisioned. His dam just adds to the package being apart of our 16P cow family that year after year produces top bulls and females that rise to the top of the pen. If you are in the market for an elite red bull, this bull needs to be seen. He is the type we strive to produce and we feel he deserves serious consideration.

This stout rascal was a real favorite in the pasture this summer and it's easy to see why. He has tremendous width over the top, spring of rib, tons of hair and had that early maturing herd bull look from a young age. As you can see from the picture, he was very impressive beside his mother all summer long. This potential has just kept on developing into the outstanding bull he is today. We can't say enough good things about these Sentinel calves, they are everything we were hoping for and we look forward to the impact they will have on our program and yours.

A real eye catching bull that is very clean through the neck and shoulder, explosive in his rib shape and full through the hip. He has great presence and character about him, making him easy to find when you enter the pen. He moves out very freely with a long full stride, attributes that we feel are very important. Combine all this with a moderate birth weight and a strong cow behind him, we feel he checks off all the boxes for a future herd sire. Don't miss out on this one.

A very complete, dark red, wide topped bull with lots of hair and a square hip. His dam is a dark red, perfect uddered cow that is part of our 16P cow family, which is one of our very best. He is sired by Diablo who we have used for a number of years, producing both bulls and females that rise to the top of the pen. He consistently sires easy keeping, thick made, good footed cattle. Combine these traits in a bull with a moderate birth weight, and excellent CE and BW EPDs, making him an appealing choice.

5

TPP CROCUS WESTCOTT 50E

This bull is impressive from every angle. Full through the flank, deep through the heart and a huge hip that carries all the way down. Move in behind him and you will see he has so much width across the top and rib shape. His mother is hands down one of our very best cows. This is the sixth son she has raised for this sale and every year they have been at the top of the pen. If the cow family standing behind your next herd sire is just as important as the bull in front of you, have a look here. The fact that he is a Westcott son, the \$165,000 phenom that has taken the breed by storm, just makes things that much more exciting. Both the bull himself and his genetics say that his progeny will be outstanding.

He is soggy, soft sided, with loads of hair and just an 82 lbs. birth weight. With his explosive rib shape combined with tremendous eye appeal, you wouldn't guess he is just a March born bull. His dam is a perfect uddered Amarillo daughter who did a great job here. The Amarillo daughters are very broody, angular females that are becoming some of our strongest young cows. This is a bull that will put a lot of muscle shape and style into his calves, have a look here.

Huge hipped, big middle, soft made and free moving are all words to describe this outstanding individual. This is the type of bull we strive to raise, solid made with lots of natural thickness and hair. When you get in behind him he has a ton of width and spring of rib. His sire, Diablo, has really impressed us with his ability to sire both bulls and females with great muscle patterns and eye appeal. Good performance, large testicles and good disposition are just some of the excellent traits he will pass on to his calves. We think very highly of this bull, and we think you will see why.

A feature calving ease prospect that will be sure to draw some attention on sale day. His sire, Deputy, is a bull that was one of the top calving ease bulls to sell when he commanded \$77,500. All reports confirm that Deputy has sired light birth weight calves that were born very easy, and develop into cattle with lots of style and eye appeal. His dam is a first calf heifer that more than proved herself on her first calf and is developing into a very powerful brood cow. This is a calving ease prospect with a different twist in pedigree, sure to have a bright future.

Homozygous Polled

10

TPP CROCUS WESTBROOK 25E

A big time herd bull prospect that we are proud to offer. Deep sided, long bodied and loose made, standing on big correct feet. He demonstrates explosive rib shape and width over the top. We along with many breeders have been very impressed with these Westcott calves; they have created quite the buzz in the last few months. This bull's dam is a model female with a picture perfect udder and has been an excellent producer in her career. This is a bull that ties it all together, both in genetics and phenotype. He has tremendous potential and will have a big impact in the future.

A loose made, deep ribbed bull with a long, easy stride and tons of hair. He is out of a real deep sided, structurally sound cow with a flawless udder. The Shear Force daughters have become some of the most productive and sought after cows in the breed. These excellent maternal qualities will sure to be passed on to this bull's daughters, and the results will be seen in your cowherd for many years to come.

Homozygous Polled Homozygous Black

15

LTS CROCUS COMMISS 40E

This is a standout black bull that commands your attention. Naturally thick, deep bodied, full quartered with explosive rib shape when you get in behind him. He gets out and moves with ease, and stands square on big correct feet. His dam has done it again, always raising a top calf no matter how she is bred. She was a high selling female at Shades of the Prairies a number of years ago from McMillen Ranching, and she continues to produce at an elite level. She ranks as one of our top black cows in both body type and production record. This bull truly represents what we are striving to produce both in phenotype and the genetics behind him.

A powerful bull with tremendous length, great balance, with lots of presence and character to him. A full brother sold in last year's sale to Perrin Ranching at Beechy, and this bull follows that same pattern. He moves out with ease, a long full stride that is so important. Pounds matter when you are selling your calves. Here is a bull that will sire some outstanding early maturing heavy weight calves, and you will get paid for those extra pounds on sale day!

17

TPP CROCUS COBRA 57E

A real eye catching, stout made bull that is very clean through the shoulder, deep through the middle and full through the hindquarter. It is rare to find a bull with such an attractive, smooth front end, yet very thick and stout in his make up. He ranks in the top 10% of the breed for calving ease and top 3% for MCE EPD, along with having a moderate birth weight. The Cobra progeny have become highly sought after, and for good reason. They pack a ton of eye appeal and muscle, all while maintaining strong calving ease traits. This bull will pass that great look and presence to his calves.

A soggy, heavy haired bull that will add thickness and dimension to your next calf crop. He is sired by Lotto, a bull we have used for a number of years for his consistency and quality. His daughters are flat out awesome females. They are feminine, yet very broody with perfect udders. These maternal strengths are further shown in this bull's EPDs, ranking him in the top 20% for both Milk and MCE. All this maternal power, and this bull still shows a very strong weaning weight. A well rounded bull for sure that will fit well into any program.

Here is a very high-ranking bull, he's very stylish, long bodied, deep sided, sound structured with a lot of presence and character. We are very impressed with our Commissioner calves, they are early maturing, well muscled and get out and move very freely. We used him again heavily after seeing the quality of both his sons and daughters. This bull's dam is an ideal type of female who is angular and broody, with an excellent udder, which are qualities that all the Black Jack daughters possess. Mark this guy high, as he will sire a great group of calves.

Homozygous Polled HOMOZYGOUS Black

20

TPP CROCUS COMMISS 33E

This was one of our favorite bulls all summer in the pasture and he continues to impress us each day. He is an early maturing, free moving bull with a lot of natural thickness and testicle, from a big volume Black Edition blaze face cow. She continues to produce the good ones, with this being the fifth bull she has put through this sale. They have all been the easy keeping, deep-ribbed, well-muscled kind. The Black Edition daughters are treasured for their outstanding production and udder quality, traits that this bull will pass on. He is the type that will really be noticed sale day, and his calves will stand out for years to come.

ryanxbart@gmail.com

Welcome to our 9th annual bull sale. When we say that, we are always amazed at how quickly the years cycle around.

We were just looking at our first and second catalogues and the progression in the bulls over 8 years is so obvious. The birth weights are better, the bulls are more moderate framed while improving performance, and the bulls are more visually attractive.

Our bulls will be up to 90 days younger than a lot of the rest of the bulls in the sale so remember to take that into consideration when you are analyzing the offering. The performance numbers are available, and we guarantee their performance is as good as any you can find.

We will semen test these bulls at 11 months of age as we have in the past and the results have been great with only a few re-tests and large scrotal measurements.

Over the 85-day feeding period, they averaged an ADG of 3.75 lbs/day. They are hand fed a 14% bull ration and free choice crested wheat / alfalfa hay along with 20% lick tubs. The bulls we select to bring to the sale are all right at the top of the performance indexes.

Finally, but definitely the most important, thank you to all our bull sale customers and friends. The response at our first sale was overwhelming and that has not changed. We have developed a loyal base of repeat customers and you can be assured that we are doing everything we can to improve the genetics we make available to you. The last number of years we have spared no expense is securing the best bulls and females to improve our genetic base. We believe the only way to improve your herd is with better genetics.

If you have any questions about the bulls or would like to come out and look at the dams feel free to give us a call.

X-T SIMMENTALS

21 X-T RED ROCKET MAN 14E

Sire: MRL Missile 138C

ROCKET MAN was pictured mid December just before being displayed at the Medicine Hat Pen Show. His dam is a big bodied, solid red OH KAY cow who raised us an excellent BEEF KING replacement female on her first effort. She is a perfect footed, perfect uddered young cow that you would just love if you saw her. 14E has been a standout since he was a young calf in a strong group of MISSILE calves that are all good. We had over 80 MISSILE calves born in 2017 and there was not one who was not an improvement on what their dams had done in the past. All our MISSILE calves are so consistent and similar in type, you can just pick them out of a group as they are so distinctive. MISSILE calves very well with most calves in the 80 - 90 lbs. range. We only had one calf at a 100 lbs. out of a big high birth weight cow. Purebred breeders take a good look a these top end MISSILE calves, they will move your program along in the right direction.

X-T BLACK MISSILE 112E

This moderate framed calf looks so much like his sire at the same age. He's a heavier boned, wide based calf with a big thick loin and top and lots of depth of rib. You will love his type when you see him! His young dam's first calf was a half blood bull who caused some excitement through this sale, selling to Kurt and Jenn Gleim at Chaplin, SK. The following years she had two sets of twins and now 112E for the sale this year. She is an excellent young cow. Her dam 122N, was a real mainstay in our herd until she was 15 years old, never missing a calf and her udder was just perfect at that age. This is a really good black bull that you should take a careful look at. Remember he will only be a little over 11 months of age a sale time.

X-T BLACK FORCE 1E

BLACK FORCE is a calving ease Cadillac! With his light birth weight, his pedigree, moderate bone and frame, he is a natural for the heifer pen. There is more to this bull than that, however. His first calf dam, a great young MRL DISCOVERY daughter, was a high seller from Maxwell's at the Camrose Country Classic Sale. This bull is 90 days older than the rest of our bulls but was managed the same, so this really affected his weaning performance. He made up for poor management when he was put on feed. This guy is much more than just a heifer bull! **Homozygous Polled Heterozygous Black**

Dam: NUG Ruby 596C

This very moderate framed bull sure packs a lot of pounds on his naturally really thick body. His dam is also a very moderate cow but a big-time producer. This is her fourth bull through this sale, two other bulls sold privately, and she had a HEAVYWEIGHT daughter through the Agribition sale to Bill Peters at Perdue. She is from the same cow family as the dam of LW 53E.

Here's the performance king of this year's bull calves. Just look at those numbers; they are as good as you will find. This guy is extremely long with a big top and lots of muscling and all with a very acceptable birth weight of 90 lbs. His dam has been a very good producer with a \$10,000 TRACKER daughter to Perkins Land and Cattle and then one of last year's high selling black bulls; an IGNITION son to Peacock Ranch. Wouldn't he work great on a set of black cows that needed some more power in their calves. 117E grew a set of loose scurs this winter so we removed them in January. He can still sire polled calves.

Welcome to the 9th Annual Southwest Showcase Bull Sale. We feel privileged to sell bulls with such a great group of consignors. We are really excited about this years offering and hope you will be able to join us.

We have a very strong set of black bulls this year. In our attempt to get more Temptation females, we ended up with three bulls instead. This is old breeding, but the backbone of our herd. Our new Herdsire Motley, gave us 2 standouts that we are excited about and we have two neat crossbreds out of our Sweet Meat 51B bull. On the red side, Vista has an awesome set of late February to mid March bulls whose performance and phenotype have impressed. We also have some Sheriff and Capone calves to provide some calving ease.

We would be happy to show you around the ranch, but if you can't come in person, be sure to check-out our website www.boundaryranch.ca. All the most up to date information is available on the website, including videos, weights and scrotals, and every bull's dam and sire are pictured, as well as many siblings. It's worth checking out.

Thank you to Bouchard Livestock for the excellent job they do managing the sale. Thanks to all the bidders and buyers who have supported our program in the past. We hope to see you all sale day.

36 BOUNDARY DISCOVERY 39E

A smooth, balanced, powerful Discovery son with big testicals. We have a couple Discovery daughters in production now that we have been impressed with. His dam is a tank with tons of milk. She has two daughters in production, a powerful Full Throttle and an Odin with a son in the sale Lot 37. 91Y's granddaughter was Champion Heifer Calf at Ranchmens Pen Show in Swift Current and Junior Champion at Expo boeuf. 39E has EPDs in the top 30% BW, 3% MCE, 15% STAY. His phenotype is very similar to that of his sire as a yearling. Discovery 39E will not be hard to find sale day.

Big opportunity here, a deep bodied, docile, heavy haired Temptation son, out of our Abricot 202Z cow who has had two of our top bulls the last couple years. 143C that sold to Camden Cattle Co and 4D that we kept to walk our pastures. We lost 202Z last April so 96E did not have a mother, yet still weaned well and is really coming on now, with the top ADG of the black bulls. EPDs in the top 30% Milk, 4% STAY. Guaranteed this would have been one of our top black bulls had he had a mother.

Heterozygous Polled Heterozygous Black

These two bulls are a product of our flush program, and definitely one of my favorite flushes to date. They are both so exceptional and striking in their depth of body, hair, width of top, bone, performance, and fleshing ability. 48E ranked 1st of the black bulls for Actual WW & YW, AYW & 365 WPDA. He Ranked 2nd for AWW, 205 day ADG, and WPDA. 98E ranked 2nd for AYW and ADG and 3rd for 205 Day ADG & Actual YW. They have EPDs in the top 2% WW & YW, 25% MCE, 20% MWWT. Many will remember 48E from the Medicine Hat Pen Show but he was also the Reserve Champion Bull at the Ranchmen's Pen Show. Their Dam is starting to have a huge impact on our herd with many daughters and granddaughters in production including 151C with Lot 63 in the sale and 28Z with feature son Lot 54. Tango 609S had the Champion Bull Calf at Ranchmen's Pen Show a few years ago with Hot Topic 120B that sold to Cross C Cattle Co. Another maternal brother walked our pastures as well as a grandson. Pick either one or both, we feel they could have a massive impact on any herd. **Heterozygous Polled Heterozygous Black**

BOUNDARY COBRA 16E

A real sale feature here. You have to appreciate the rib, hair, and bone in this Cobra son. Very similar in type to our high selling Cobra in last years sale to Neil Carson. His dam is near flawless- clean made, deep bodied, with a perfect udder. All traits she has passed on to her daughters, one with a son selling Lot 43. That daughter was also Champion Cow with Bull Calf at Ranchmens Pen Show last fall. Storm 11X had a feature son sell last year to RJ Livestock & Flemming Stock Farms, and another son walking our commercial herd. His grandam was a no miss cow that was the foundation of our Storm cow family and produced many champions. 16E has EPDs in the top 10% CE, 25% BW, 35% Milk, 25 % MCE and a low 283 day gestation, big time opportunity here. 16E tied for 1st 365 Day ADG of the black bulls. **Homozygous Polled Homozygous Black**

Maternal Grand Dam:
Miss Tee 41R

Here is the ranch pet, affectionately called "licks" by our girls. A good balanced bull, with a strong top line, and nice front end. His dam is a moderate framed cow and his grandam is the foundation of our Marigold cow family. EPDs in the top 10% CE, 25% BW, so he should provide some calving ease and add docility to his calf crop.

Homozygous Polled Heterozygous Black

45

BOUNDARY HIGH VOLTAGE 101E

BPG1200994 BOUN 101E POLLED JAN. 21, 2017

Heifer bull. A stylish, nicely put together High Voltage son, out of a moderate framed Walk The Line daughter that has an ideal udder. His grandam Reggie 171Z had the high selling bull a few years ago to Curtis Simmentals. 101E is backed by many generations of great Reggie cows and we have been really impressed with the High Voltage females, so there is lots of maternal potential here. We appreciate the calving ease of his sire High Voltage, so we are using more of him in our heifer pen. 101E has an amazing EPD profile, ranking in the top 15% CE, 30% BW, 35% WW, 30% YW, 35% STAY, a low 282 day gestation and a moderate birth weight, so we think he will work on heifers.

1½ blood. A balanced, super hairy, Sweet Meat 51B son out of a great, heavy milking crossbred cow. His dam had an impressive Odin son sell to Shawn Kramer and his 2-year-old sister is a visitor favorite. His Grandam has a ¾ brother that sells Lot 47. EPDs in the top 20% BW and a gestation of only 277 days so his calves should come easily. Candy likes to lick her calves ears, so he froze them a bit, but he doesn't need the tips of his ears to breed cows, I promise.

Homozygous Polled Heterozygous Black

49

BOUNDARY MOTLEY 142E

Deep bodied with great hair, clean made and overall very attractive, this bull is impressive in every way. His dam is equally remarkable. She was Champion Cow with Bull Calf at Ranchmen's Pen Show in 2015 with our Walking Herdsire Esquire 6C at side. 6C was also a member of our Champion Pen of Bulls MHPS 2015. She was Reserve Champion in 2013 with Identity 11A, who sold to Golden Rock Acres. She has 2 young daughters in production, one with a son in this sale Lot 52. We are really excited about 142E's sire Motley, who had only three calves last year, but both bulls made the show pen and the female is a top replacement. 142E has EPDs in the top 35% CE, 35% WW, 30% YW, 35% MCE, 10% STAY and ranked 2nd for 365 day ADG, 3rd for 205 Day and 365 Day WPDA, so he's not just a pretty face. Big time pedigree, phenotype and numbers on this fella.

One of only two Motley bull calves we've had and boy are they exciting. Both should be features. 163E is one of the fanciest bull calves we have sold, tons of great hair, exceptionally clean made, but still has a big bold hip. His dam is a powerful Red Bull daughter that is a maternal sister to the \$50,000 Astute bull we sold to Spring Lake and BLI. She has a gorgeous Authority daughter in herd. If you are looking to add some style and presence to your calf crop, this guy will do it.

Two years ago we had a bull wreck and we can't thank Barry Labatte enough for bailing us out. He sent us the bull we call Vista, and we were impressed. His phenotype, color and docility hit the mark, and his calves are just as good. It's hard to believe that the Vistas are 2 months younger than a lot of the bulls in the offering. They were the highest performance group and they just keep getting better every day. Vista is out of the great Pocohontas 68M. He's had two full brothers sell for \$16,000 & \$17,000, and two sisters sell for \$27,000 and \$14,250.

54

BOUNDARY 68M VISTA 204E

This Vista bull definitely looks the part - huge hiped, big topped, long bodied, and very clean in his front end. He also has an impressive set of numbers, ranking 2nd of the red bulls for 365 Day ADG & WPDA, 3rd for AWW, 205 Day ADG, WPDA & AYW. Add to that an EPD profile ranking him in the top 10% CE, 25% BW, 10% WW, 15% YW, 20% MCE, 35 % MWWT, 25% STAY. His dam is a gorgeous Odin daughter with impeccable teat placement, udder attachment and lots of milk. Traits that have been passed on to both of her daughters in herd. 204E will have sons that pound down the scale and daughters that shine.

This bull couldn't possibly have any more shape to him, deep bodied, big bold hip, clean front-end, and dark red hair coat. His dam and granddam are the same liver red color. His dam is a fancy, moderate framed Diablo daughter. His granddam was purchased at CWA where she was the high selling bred. 209E has EPDs in the top 35% CE, 15% WW, & 35% STAY. Really neat package here.

Homozygous Polled Non-Dilutor

This guy is really special. They don't make them with much more rib, darker red or with a deeper flank. His dam is a deep bodied, moderate framed, Gunner daughter with lots of milk, she will be entering our flush program this spring. 834U has had sons sell to Globe Livestock, another son that was a high seller at \$28,000 to Tri - Star Cattle Co that we use in our own program, a son to Kristine Scheller & Roxanna White, and one to Trailsnorth Ranch. Her only daughter is a true beauty and has a son in the sale Lot 59. 834U also has a sister with a feature son Lot 49. Vista 242E is our youngest bull in the sale, but he weighs up with bulls 2 months older. He ranked 1st of the red bulls for 205 Day ADG & WPDA and 2nd for AWW and has EPDs in the top 25% CE, 5% WW, 20% YW, 25% MCE, 35% MWWT, & 10% STAY. 242E will be a herd changer for sure.

TERMS & CONDITIONS

The terms of the sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after settlement is made. Bouchard Livestock Ltd reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should the purchaser fail to settle for his purchase, Bouchard Livestock Ltd. reserves full power to resell the animal to the best advantage, either publicly or privately, without further notice. Any loss arising from such resale, together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. The owners, Bouchard Livestock Ltd. and sale staff have the right to refuse bids from anyone who has a previous record of default in payment and/or who has not made prior credit arrangements prior to the sale with the owners and/or Sale Management.

Bid Every animal consigned to the sale must be sold by auction. No by-bidding will be permitted. Each animal will be sold to the highest bidder.

Disputes In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

Purchaser's Risk Each animal becomes the risk of the purchaser as soon as sold.

Announcements from the auction block will take precedence over printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

Certificate Of Registry The proper Registration of Recordation paper, as the case may be, will be duly transferred and furnished to the buyer for each animal after settlement has been made.

Shipping Assistance will be given in making shipment after the sale, but Sale Management or Seller assumes no risk. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instruction when making settlement.

Guarantee All animals will carry standard breeding guarantee as specified by the applicable Canadian breed Association. At no time shall the seller's liability exceed the purchased price of the animal.

Exception To Guarantee In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void. In the cases of bulls, they are guaranteed to breed naturally according to applicable Canadian breed Association guarantee, but no guarantee is given that semen from any bull will freeze.

Health It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Bouchard Livestock Ltd assumes no responsibility for the health status of any animal in the sale.

Accidents Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sale Management, auctioneer, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

Rights And Obligations The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and the terms and conditions of this sale do not cover obligations of the two parties connected thereto.

Bouchard Livestock Ltd Is Agent Only It is clearly understood that Bouchard Livestock Ltd acts only as agent between buyer and seller and is not in any way responsible for any failure by either party to live up to his or her obligations. Bouchard Livestock Ltd does not assume any financial obligations to collect or enforce collection of monies by either parties, and in exceptional case, any legal action will be between buyer and seller. Bouchard Livestock Ltd has no ownership of the facility and assumes no responsibility for the operation of said facility

THANK YOU TO OUR 2017 BULL SALE BUYERS
