Heartland Livestock Swift Current, Swift Current, SK

SWS SOUTHWEST SHOWCASE BULL SALE

WELCOME FROM BOUCHARD LIVESTOCK

Welcome to the 2019 edition of the Southwest Showcase Bull Sale. I have just returned from tour across the southern prairies and must say I am impressed with the way young Simmental potential herd sires are handling two and a half weeks of temperatures hovering around minus thirty degrees. As you all know it is important to incorporate genetics that are adaptable to your individual conditions. The Southwest Showcase has become one of the stops you need to include in your search for a sound reliable herdbull, be it purebred or commercial needs. All three breeding establishments are utilizing some of the highest level AI sires as well as conducting an ongoing year round search for the best walking herdbulls their individual operations can accommodate. You will find bulls with loads of style and eye appeal. There will be several big time performance bulls for your mature cowherd as well as specific individuals well suited to the heifer pasture.

I encourage you to discuss your herdbull need with any of the folks at these three breed leading operations ahead of sale day. We invite all of you to join us at Heartland Livestock in Swift Current on Monday March 25. If for any reason you are unable to attend or require assistance I invite you to call any of the listed Bouchard Livestock phone numbers. We always look forward to your calls and are pleased to be a part of the Southwest Showcase Sale since its inception. Wishing you all the best for 2019.

LUNCH

Please join us for a great lunch at noon.

SIGHT UNSEEN PURCHASE PROGRAM

If you are unable to attend the sale but are interested in bulls, give the consignors a call and they will personally go over the bulls and your program and recommend bulls that would meet your needs and refer you to one of the sale staff who will represent your needs in a professional and confidential manner.

100% GUARANTEE

All bulls are guaranteed to be satisfactory breeders in accordance with CSA guidelines. Should a problem occur barring physical injury or mismanagement, a bull of equal value will be provided or a credit will be issued towards the purchase of another bull. We guarantee you will have a bull to service your cows.

HEALTH AND FERTILITY

All bulls will have a scrotal measurement and a vet examination done prior to the sale. All bulls over 12 months of age will also be semen tested; any bulls under 12 months of age will return to the seller's farm to be tested after the sale. These bulls will be delivered once a semen test has been passed. All bulls have been treated with Ivomec and have current vaccinations. Contact the breeder for specific herd health programs.

IN-HERD USE SEMEN RIGHTS

The Southwest Showcase consignors reserve the right to collect semen on any bull in the sale for their in-herd use only. Any questions please contact the consignors.

BULL DEVELOPMENT & DELIVERY

The Southwest Showcase consignors will keep bulls free of charge until May 1st, 2019. Buyers need to insure the bulls while being cared for by the consignors.

Option A

Bulls can be picked up at Heartland Livestock sale day and a \$50 discount will be deducted from the sale price

Option B

At the buyer's option and risk, the bulls can be returned to the consignor's farm and picked up anytime at the buyer's convenience.

Option C

Please make arrangements with the consignor if trucking is required.

EPD EXPLANATION

EPDs are "Expected Progeny Differences". They are a useful tool in selection. EPDs incorporate the individual animal with its averaged ancestry performance. EPDs do not compare across cattle breeds, they are individually based per breed. EPDs indicate a probable variance above or below breed average for that trait for a given bull's progeny. Use them for guidance in the direction you want your herd to go.

CSA Average Spring EPDs

X-T SIMMENTALS

Welcome to our 10th sale – man where have the last 10 years gone? We are very proud to have this many sales considering the average purebred breeder lasts less than 7 years. We have been at it for 47 years and in that time have developed a very maternal cow herd that look after themselves on pasture 12 months a year. There are no fancy feed rations or bins of grain here; just lots of grass and good hay.

The bulls are hand fed a 14% bull ration and free choice hay plus 20% lick tubs. You can find a lot of fatter, harder pushed bulls but won't find sounder bulls that won't melt down when they go to work for you.

We have many repeat bull customers who tell us these bulls stay sound for many years. We would like to say a very big thank you to all our customers whether you have bought 10 bulls or 1; you are what keeps us doing this. Thank you very much! We work very hard to source the best genetics we can to pass them on to you.

If you have any questions about the bulls, please contact Ryan or myself

1 X-T RED REGULATOR 31F

We think a very good choice to start our red selection of the sale. A calf with lots of middle, a big top, and ample spring of rib while still being super attractive. His dam is a super young blaze faced daughter of the cow maker RED ZONE 16A. What a job she did on her first calf under very tough conditions this past summer with extreme heat and no rain. Nevertheless, she raised a big calf with no creep, looked great dong it, and bred right back. I wish we had a good picture of her, but we don't and I am not sure that will happen as when we are getting pictures of bulls it is -25, windy and snowing. REGULATOR, his sire, is sired by the CAPONE bull out of the dam of RED WHISKEY. That is about as royally bred as it gets in the red cattle. REGULATOR was the high selling red bull at the 2017 MRL bull sale at \$33,000. REGULATOR is featured in the Bouchard Livestock semen catalogue. 31F is a real herd bull prospect!

2

X-T RED REGULATOR 30F

This is a dark red, very powerful performance bull. His weaning weight EPD's are in the top 3% of the entire breed and his yearling weight EPD's in the top 4%. All with only a 96# birth weight. His dam is also very dark red, very attractive, thick bodied, with a little more bone and muscle to her. She was purchased at Checkers as one of the high selling heifers out of the Robb Farms program. We have the misfortune to lose her first calf with a bad navel infection that we could not get to clear up. If you have a bunch of red cows that need more performance injected into them, this is the bull that will do that and more in one generation.

X-T RED REGULATOR 87F

This is another thick, dark red, powerful son of REGULATOR. The sons are all so dark red and thick haired and the females are something special! The dam of this bull is probably our heaviest cow – she is just a tank. We have only sold two of her daughters. One to MRL at Agribition and she has done very well for the McMillan family, and a TRACKER daughter for \$21,000 at Simmsational to LC Ranch where she is in their embryo program. 87F is also her third bull in the last 5 years through this sale.

You always want to have your herd bulls out of the best cows you can find and 47S is one of our best! I always say to Ryan that we could breed her to the neighbor's billy goat and she would still have one of the best calves.

Another REGULATOR son with a touch more frame. If you study his performance numbers, they are in the top 25% of the breed. Also, his milk numbers are absolutely respectable for a red bull. 20F has a super disposition just like his dam. Her first bull calf, a RED ZONE, sold to Paul Lacasse of Kincaid, SK.

Here's another dark red REGULATOR with a shot more frame and again great performance EPD's The dam is a super young BODY BUILDER cow we bought at the Pembina Triangle sale as a high selling bred. Does it get much better for a mother cow than a BODY BUILDER? Her first calf was retained as a replacement, her second calf is a MISSLE heifer calf that went to Triple R Simmentals in Manitoba, and now her REGULATOR bull to this sale If you could see this cow you would really admire her; she exemplifies what a beef cow should be.

Here's a real calving ease prospect. Both his sire and grandsire, BLACK EDITION, have been used very successfully as heifer bulls at MRL. In addition to that, BLACK EDITION is a legend for the females he produces and also the grandsire on the top side, MRL 91Y, is creating his own legacy with his daughters. This is a bull you can take home and produce top end replacement females out of your heifers who could be genetically your best females. **Homozygous Polled Test Pending**

Another bull with calving ease potential. His sire has been used very successfully on heifers and with his 81lb birth weight and very small tidy head, we think he could work on well developed heifers. In addition, he is a very deep ribbed and big topped calf. This guy has three shots of BODYBUILDER and also RED FORCE and RED LABEL in his immediate pedigree, so he could also be a real female producing sire. **Homozygous Polled Test Pending**

This is a REGULATOR son with breed average performance numbers. However, the bottom side of his pedigree is the interesting part. His dam's sire is a bull that we lost too soon due to a lightning strike. We only got two calf crops and his daughters have turned out to be real calf producing machines. SEISMIC had a milk EPD of 35 and that is sure reflected in his daughters. The granddam, 122N, was a beautiful BODY BUILDER cow who produced a top end bull or a replacement heifer every year until she was finally retired at 16 years of age.

It was a great day for us and our partners Robb Farms and Bouchard Livestock when we purchased MISSLE for \$100,000. I think in terms of return on investment, he is the cheapest bull we have every bought. The old adage "you get what you pay for" sure rang true here. You will only see the bulls at the sale and as good as they are, we think the females will be his legacy. If you search back through his pedigree you will find generation after generation of elite females all stacked up. The MISSILE females have been very well accepted at many elite purebred female sales

When the chance to purchase a CAPONE sired bull out of the dam of RED WHISKEY came up, we knew we had to take advantage of that opportunity. He was the high selling red bull that day at \$33,000 – money well spent. His sons are maturing very well, and we like them better all the time. Lots of performance, attractive, and lots of thick soft hair. The yearling heifers look really good also. They are very fancy females with lots of growth. Once again, a bull with a ton of cow power on both sides of his pedigree. His dam MRL 677Y would take two pages alone to list her accomplishments. **Homozygous Polled**

This is a real fancy fronted calf with lots of performance in his pedigree. He is a real nice headed bull with lots of top and a great hair coat. The dam is a very attractive ACCELERATOR cow with lots of capacity and always stays in great condition. Her 2017 bull sired by RED ZONE sold to Beaver Valley Grazing – thank you Kelly and associates!

 X-T Red Zone 27E

14 X-T BLACK MISSILE 78F

Maternal Sister:
X-T Black Debutante 10D

This is a bull that needs to go to a new home where his full potential will be realized. He will make a hell of a herd bull for his new owners. The MISSILE's both males and females are such perfect beef cattle; long, super thick, and extremely deep ribbed. The temperament on the guy is just amazing, he just wants to be everyone's buddy. His dam is a great young cow, perfect feet and udder, and super attractive. She is the dam of the IGNITION bred that we sold to Labatte's at Agribition and went on to produce one of their feature bulls by MISSILE in their 2019 bull sale.

Make sure you look this guy up sale day!

This is a full brother in blood to the bull just above, 78F. He is super thick and moderate framed with just the right amount of bone and is a very attractive headed calf. The dam on her first effort raised the black calf by VISION that we called X-T DIESEL and sold through this sale to Boundary Ranch. This is a super cow family with these two full sisters producing a pair of feature bulls like these two. You will never go wrong buying a herd bull out of a super cow family

Great performance numbers on this guy; both weaning and yearling EPD's in the top 15% of the breed. This is a super deep bodied bull who is really attractive and great to work with. He has the typical MISSILE temperament. His dam is a black blaze cow that Ryan and I call a model WALK THE LINE cow. MRL WALK THE LINE was a bull we used for calving ease and he left such tremendous daughters; all so feminine and thick bodied with absolutely perfect udders and extremely sound. Keep all his daughters they will be good ones!

This is a very interesting bull. He is bigger framed than the rest of the MISSILES and has a lot of neck extension and a very showy look about him. He is more like his dam who is a huge bodied dark red cow who is a front pasture female. This is her second bull in the sale with the first one being one of our red bulls in 2016 sold to Paul Lacasse. He was shown at Agribition where he was third in class. We sold a daughter through the Agribition sale and have two daughters in herd. She has also had two sets of twins so if you are searching her progeny online, that's where the gaps come in. This guy is a real power bull out of an excellent cow!

This fella is a calving ease deluxe candidate. He is extremely small headed, and trim shouldered out of a beautiful perfect uddered 1/2 blood BISMARCK cow. With a WALK THE LINE granddam, his daughters will be standouts. He is not just a heifer bull though, just look at his weaning performance and his EPD numbers. He will calve a lot easier than his numbers show and then they will perform really well. He is in the top 25% for weaning weight and the top 30% for yearling weight.

 www.boundaryranch.ca

It's hard to believe it's been 10 years since we first started this sale. A lot has changed over the last decade. Families have grown, people have come and gone, but our main goal is the same; to provide quality bulls to our loyal customers and hopefully make some new ones.

The quality runs deep in this set of bulls. We were honored to have the Champion Pen of Bulls at the Medicine Hat Pen Show last December, against 29 very strong pens. We also had the Champion and Reserve Champion Bull at the Ranchmen's Pen Show last fall, along with Champion Cow with Bull Calf and Champion Cow with Heifer Calf. All those bulls are in this sale. That being said, winning shows isn't everything. We aim to provide a balance of performance and calving ease in our offering, to meet everyone's needs, and we hope you feel we have hit the mark.

We love showing people our cowherd, but we've been told we live in the middle of nowhere, so if you can't come in person, check-out our website WWW.BOUNDARYRANCH.CA. All the most up to date information is on the website, including videos, weights and scrotals, sire & dam pictures, and a production record for each cow. We like to have every tool available when selecting bulls, and we try to provide the same to our customers.

Thanks to all those who have supported our family operation throughout the years. Your friendship and support have meant we have the privilege to spend everyday doing what we love with the people that mean the most to us. Of course, some days are better than others!

BOUNDARY BLACK CAPONE 61F

61F is incredibly attractive in his design, with his massive hip, long spine, big rib cage, and huge top. He is square made, correct in his makeup and moves like a cat. His powerful dam has 2 excellent daughters in herd and a maternal brother that walks our pastures. 135A goes back to our Donor, Tango 609S cow that has many great uddered daughters here and a son that sells (Lot 21). Our daughters 4H projects have come from 609S 2 years in a row. Several Champions have come from this cow family. 61F has an 88 lbs BW a gestation of only 281 days and is above average for all major traits - EPDs top 25% CE, 20% BW & WW, 10% YW, 30% MCE, 35% MWWT. Exciting herd bull prospect here.

BOUNDARY COMMISSIONER 15F

15F is a bigger framed, super deep bodied, Commissioner son that many people find in the bull pen. His fancy Odin dam produces powerful sons and show stopping daughters. Her 1st daughter was Champion Heifer Calf at Ranchman's Pen Show, then sold at CWA to Alliance Simmentals. She went on to be named Junior Champion at Expo Boeuf in Quebec. We haven't had a lot of Commissioner calves but are really loving his milking daughters in herd. 15F ranked 1st of the black bulls for YADG, had a gestation of only 278 days and is above average for all EPDs - top 15% CE, 20% BW, 35% WW, 10% YW, 20% MCE. Here is a performance bull that will also leave you with some great females.

Another really cool Black Hawk bull that patterns like his brother. We really appreciate the stoutness and calving ease in these Black Hawk calves. Very easy fleshing. His grandam Storm 53W produced a couple of good heifer bulls going to Deeg Simmentals and Jerred Henderson. 185F has EPDs in the top 10% CE & BW, 35% Milk so he'll provide calving ease and daughters with lots of milk. He is our youngest black bull in the offering, but you sure can't tell.

Homozygous Polled Heterozygous BlackGrand dam:
Boundary Storm 53W

25

BOUNDARY COBRA 11F

Here is a full brother to the high seller a couple years ago to Northern Lights Simmentals. Must admit, when his dam calved, we were hoping for a heifer, but this guy doesn't disappoint. A big, powerful bull that is long bodied, wide topped, has a nice quiet disposition and a lot of hair. His dam is not only a beautiful, big volume, good uddered cow, but she also knocks it out of the park every time. She has a very good maternal sister with a son in the sale (Lot 26). His grandam Abricot 511R was Champion Cow with heifer calf with his dam 5B at side, when she was 9 years old, at the Ranchmen's Pen Show. 11F ranked 3rd of the Black Bulls for AWW, WADG, WWPD, AYW, &YWPD. He had a gestation of only 280 days and an awesome EPD spread - top 25% CE, 10% WW, 10% YW, 3% STAY. 11F is a true sale feature with a lot to offer.

A very sound, hairy, Capone with some length of spine and eye appeal. His Dam is a gorgeous Walk The Line daughter with excellent teat placement and udder suspension. She has a Commissioner 2 year old that just calved with the same great body type and udder quality. 131Z also had a feature Rampage son that sold to Tom Graham a couple years ago. Her maternal sister has a feature son that sells above (Lot 25) and his grandam is none other than the great 511R. Lots of cow power backing this quality bull.

Homozygous Polled Heterozygous Black

27

BOUNDARY BLACK CAPONE 81F

One of the most powerful, eye appealing bulls in the offering. Capone has really clicked on our cows, perhaps none better than on Storm 182C. From her first 3 calves, I can tell she is going to be one to watch. 81F's grandam is phenotypically flawless, one of my favorite cows. She simply doesn't age and passes all her traits onto her progeny. She has a son that sells Lot 32. Another daughter, Storm 42B, was Champion Cow with bull calf in 2017. 81F ranked 2nd of the black bulls for YADG and had EPDs top 15% WW, 10% YW. If you're looking for a power bull backed by some great cows, look no further.

It's tough to find a bull with as much natural thickness as 85F while still being so clean made. His Dam is one of only a couple black Reggie's on the farm. She has the typical "Reggie" udder, easy fleshing ability and production record. She's had the high selling bull at this sale (going to Curtis Simmentals) and also has a cookie cutter daughter in herd. 85F is a twin, but still ranked 2nd of the black bulls for AYW, YWPD, and 3rd for YADG and has EPDs top 20% CE, 35% BW, 25% WW, 30% YW.

Heifer Bull. Another fancy, good haired, High Voltage son that is very correct in his makeup. His dam is a sweetheart Walk The line 2 year old, with ideal udder confirmation. 128F is bred top and bottom for calving ease. He has a gestation of 282 days, a birth weight of only 77 lbs and EPDs top 10% CE & BW, 20% MCE, so his numbers, pedigree and phenotype all point to him being a sleep easy heifer bull. With Walk The Line, High Voltage and his maternal pedigree, this guy should also provide some drool worthy daughters. **Homozygous Polled Non - Diluter**

31

BOUNDARY CAPONE 91F

91F has been on our radar for a long time. He is so similar in type to his 3/4 brother Scarface 154D, the high seller in our 2016 sale to Circle G Simmentals and Springcreek Colony, with the added benefit of some calving ease potential having a birth weight of 84 lbs and EPDs top 15% CE, BW & MCE. His dam is simply outstanding. Huge volume, easy fleshing, and good uddered, all while still being clean in her front end and 91F's grandam is built exactly the same. 28C's first calf was one of the high sellers in last year's sale and sold to Larry Pancewicz. We had a free Leptin test and decided to use it on 91F. He tested TT. The TT gene has been associated with improved feed efficiency and increased milk production among other things. Big time bonus on an already stellar bull. We thought long and hard about keeping this guy for ourselves, but our loss is your gain. **Homozygous Polled Non-Diluter**

Dam: Boundary Reggie 194B

205F is a nice balanced bull, the youngest in our offering. His dam had one of the most sought after bulls in our offering last year, a march born Vista bull calf that went to Sandra Jeffery. Reggie 194B also had a son sell to Jay Peterson. 194B is a granddaughter to our Reggie 8T cow who has a son in the sale Lot 33. Take a second look at this sound, young bull come sale day. **Heterozygous Polled**

44

BOUNDARY MOTLEY 77F

Member of the Champion of Bulls Medicine Hat Pen Show. 77F is really cool. Awesome hair, possibly the widest topped bull we have on offer, lots of bone and big ribbed. We sold two Motley sons in last year's sale one being a 3/4 brother to 77F that sold to Moonshine Simmentals, the other was the high selling bull, going to R Plus Simmentals. We just love our Motley calves, they all pattern the same. We collected Motley last year and will be using more of him in our program. 77F's dam is a fancy Authority daughter that is a 3/4 sib to the Astute bull that garnered \$50,000 at this sale a few years ago. He has EPDs in the 5% WW, 3% YW. If you're looking for a bull with some style and substance, 77F will be easy to find sale day.

**Homozygous Polled
 Non-Diluter**

BOUNDARY KILL SWITCH 121F

A really neat bull out of the \$210,000 Wheatland Kill Switch. We are really impressed with our Kill Switch calves this year. 121F is wide and square in his hips with lots of length of spine and good hair coat. His dam was Champion Cow with Bull Calf 121F at side at the Ranchmen's Pen Show last fall. She was 9 years old at the time. She's very long bodied, dark red, and has an excellent udder. She has a Sheriff 3 year old that just calved with the same great phenotype and perfect udder. 29W has many maternal sisters in the herd and they all have the same length and udder quality. 121F has EPDs top 25% WW & YW so he should provide some performance along with a cool look.

Welcome to the 10th annual Southwest Showcase Bull Sale. It's hard to believe that so much time has passed since we hosted our first sale, but when you work with such a great group of progressive and reputable breeders, time flies! We truly appreciate all the customer support we have received over the years, and we find ourselves more motivated than ever to bring you the highest level of herdsires to select from.

We continue to make significant investments to acquire new genetics to further complement our cowherd. Moderate framed cows that are easy fleshing with sound foot, leg and udder structure. No feet are trimmed, and the gentle dispositions in our cowherd are reflected in the bull pen. The weaning weights you see are with no creep feeding, and a good indication of their genetic potential. Every year we get a number of people commenting on how sound structured and correct our bulls are, and we feel this is very important. You need to be happy with your next herdsire not just on sale day, but for many years to come. Longevity is of utmost importance, and they are bred and fed to last.

Thank you to our sale's management team and to all the bidders and buyers over the years, your support is greatly appreciated and we look forward to working with you in the future. If you require any further information on the bulls or if you would like to view the bulls ahead of time, be sure to give us a call.

CROCUS SIMMENTALS

TPP CROCUS COMMANDER 24F

This bull has stood out from a very young age. We believe he is unique in his kind, and would be great asset to many programs. He is very smooth through the front third, displays great rib shape, tremendous depth and is so full through the hind quarter. He is as complete as you will find and balanced in every way. Combine this with just a 78 lb birth weight and a tremendous birth to weaning spread; the potential is huge for this herd sire. His young dam is proving her worth in a big way, her first calf is one of our top bred heifers, and she followed that up with this exciting herdsire. He is a unique blend of power and eye appeal that is so rare to find. We are very excited about this bull's future.

TPP CROCUS COMMISSION 5F

A powerfully constructed bull with great length, depth, rib shape and balance. Very sound and free in his movements, standing on a wide, correct base. His dam is a very nice uddered, strong producer that raised one of our top black bulls last year selling to Cypress Colony from Maple Creek. These Commissioner sons are so consistent in their type, added dimension and muscle while still maintaining eye appeal. They are right for the times and what the industry demands. Performance, structure and predictability are a sure thing with these brothers, take advantage! **Homozygous Polled Homozygous Black**

LTS CROCUS COMMISSION 11F

This is a bull that is right in many ways. Smooth through the front end, deep ribbed, flat topped and well balanced with a ton of rib shape. His dam is on of our top cows, with five daughters retained in our herd and two sons selling through the bull sale. One of her granddaughters was a heifer calf that sold at Simmsational this past fall to Deeg Simmentals and had a lot of friends on sale day. When you look back in the pedigree and see the maternal great 600U, it is no wonder why this cow has been such a great producer. The daughters from this bull will be outstanding, and he will pass on his balance, eye appeal and great muscle pattern to his progeny.

This bull's dam is one of our most promising young cows. Beautiful through the front end, broody and sound with a perfect udder. The Lotto daughters are top females in a number of programs, and we are sure happy with ours. This bull has a very strong EPD profile right across the board, with WW and YW numbers in the top 10 and 5% respectively. This bull has a lot of things going for him, and you will want to retain all of his daughters to build around. **Homozygous Polled**

53

TPP CROCUS CAPTAIN 17F

This bull ranks as one of the most exciting we have raised to date. He has been noticed by a number of visitors in the bull pen and you will see why. He commands attention with his outstanding depth of body, spring of rib, long easy stride and awesome hair. Out of a tremendously deep ribbed, structurally sound cow with a flawless udder. The Shear Force daughters are known in the industry for being some of the most productive and highly sought after cows in the breed. These excellent maternal qualities will be passed on from this bull to his daughters and the results will be seen in your cowherd for many years to come. We sold a half sister to this bull this past fall at Simmsational as the high selling heifer calf for \$10,500 to McMillen Ranching. This bull's impressive physical presence and outstanding dam are further complemented by an EPD profile that appeals to many, ranking him in the top 15% for eight categories! A bull that puts it all together and will have a big impact. **Homozygous Polled**

A very complete, wide topped, deep bodied bull with great hair and a square hip. Added muscle, while still maintaining a smooth shoulder and attractive head. His dam is a very good uddered, large volume cow that always transmits extra muscle and thickness into her calves. If you are looking for a bull to improve udders, and add extra eye appeal this bull will pass these traits on. This would be an excellent choice for your next herd sire, and he is right for today's industry.

Homozygous Polled Homozygous Black

58

TPP CROCUS SENTINEL 43F

Huge hipped, big middle, soft made and free moving are all words to describe this impressive individual. This is the type we strive to raise, solid made with lots of natural thickness and hair. He will sire those awesome blaze face females that are always in such high demand at every bred heifer sale. His sire Sentinel has really impressed us with his ability to sire both bulls and females with great muscle patterns and eye appeal. Good performance, large testicles and gentle dispositions are some of the traits he will pass on to his calves. We think very highly of this bull, and we think you will see why.

LTS CROCUS WESTCOTT 35F

Some of the most exciting cattle in the breed the last two years have been Westcott sons and daughters, and for good reason. They are impressive at every stage of development, with unmatched substance, dimension and structure. We sold two Westcott daughters at Simmsational where they were the high selling heifer calves, both commanding over \$10,000 each. This bull combines the Westcott line with the great Wallbanger, a bull that has written his own chapter of impressive progeny. His dam raised one of our high selling bulls two years ago, working at the impressive herd of Cypress Colony. This deep sided, huge hipped, wide topped bull has a ton of character and presence, and will have a real impact on someone's herd.

Tons of hair, top and muscle in this bull, something that his sire consistently puts in his calves every time. The Sentinel sons are early maturing and impress at a young age. Sound foot and leg structure is so crucial, and the Sentinel progeny always have it. Look for this guy to sire a group of stout, good haired calves that will turn heads come fall and bring a premium.

TPP CROCUS WESTCOTT 38F

If you are in the business to produce those highly sought after blaze face calves, take a look here. He is sired by Westcott who has created quite the stir. His calves are the top of every program he is used in, and the daughters moving into production are simply tremendous. We have a full sister to this bull in our group of bred heifers and she stands right at the top. This bull ranks in the top 4 and 5% of the breed for WW and YW respectively. His natural depth, hip and overall thickness displayed are truly outstanding. He has tremendous potential and will have a big impact in the future.

This bull is impressive from every angle. Full through the flank, deep through the heart and a big hip that carries all the way down. When you get in behind him he has so much width over the top and a ton of awesome hair. His mother comes from one of our very best cow families, back to the 16P female that has had such a strong influence for us. A maternal brother sold in last year's sale selling to S Bar B Farms at Fox Valley. This bull will add muscle shape, hair and improve udders, just like all the cows in this family. Both the bull himself and his genetics say that his progeny will be outstanding.

A feature calving ease prospect that will be easy to find on sale day. Very clean and smooth through the front end, while still displaying good thickness and eye appeal throughout. His sire, The Starter, is a proven calving ease bull with a highly maternal pedigree. His dam is a first calf heifer that more than proved herself on her first calf and is developing into a powerful brood cow. This is a calving ease prospect with a different twist in pedigree, sure to have a bright future. **Homozygous Polled**

TERMS & CONDITIONS

The terms of the sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after settlement is made. Bouchard Livestock Ltd reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should the purchaser fail to settle for his purchase, Bouchard Livestock Ltd. reserves full power to resell the animal to the best advantage, either publicly or privately, without further notice. Any loss arising from such resale, together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. The owners, Bouchard Livestock Ltd. and sale staff have the right to refuse bids from anyone who has a previous record of default in payment and/or who has not made prior credit arrangements prior to the sale with the owners and/or Sale Management.

Bid Every animal consigned to the sale must be sold by auction. No by-bidding will be permitted. Each animal will be sold to the highest bidder.

Disputes In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

Purchaser's Risk Each animal becomes the risk of the purchaser as soon as sold.

Announcements from the auction block will take precedence over printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

Certificate Of Registry The proper Registration of Recordation paper, as the case may be, will be duly transferred and furnished to the buyer for each animal after settlement has been made.

Shipping Assistance will be given in making shipment after the sale, but Sale Management or Seller assumes no risk. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instruction when making settlement.

Guarantee All animals will carry standard breeding guarantee as specified by the applicable Canadian breed Association. At no time shall the seller's liability exceed the purchased price of the animal.

Exception To Guarantee In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void. In the cases of bulls, they are guaranteed to breed naturally according to applicable Canadian breed Association guarantee, but no guarantee is given that semen from any bull will freeze.

Health It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Bouchard Livestock Ltd assumes no responsibility for the health status of any animal in the sale.

Accidents Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sale Management, auctioneer, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

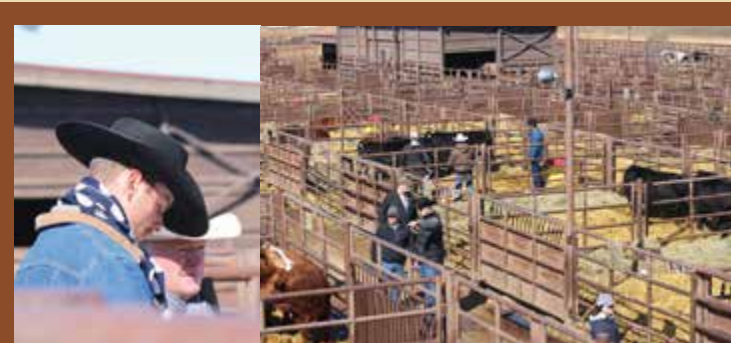

Rights And Obligations The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and the terms and conditions of this sale do not cover obligations of the two parties connected thereto.

Bouchard Livestock Ltd Is Agent Only It is clearly understood that Bouchard Livestock Ltd acts only as agent between buyer and seller and is not in any way responsible for any failure by either party to live up to his or her obligations. Bouchard Livestock Ltd does not assume any financial obligations to collect or enforce collection of monies by either parties, and in exceptional case, any legal action will be between buyer and seller. Bouchard Livestock Ltd has no ownership of the facility and assumes no responsibility for the operation of said facility
