LOCATION:

S.A.L.E. Cowtown Livestock, 1.6 km East of Maple Creek, SK. Online Viewing and Bidding at DLMS.ca

TERMS:

Please register for a buyer number at the office prior to purchasing. All bulls sell under the Terms & Conditions of S.A.L.E. Cowtown. Terms of sale are cash or cheque payable to S.A.L.E. Cowtown Livestock. No bulls will be released without satisfactory settlement. When making settlement for your purchases, please leave specific instructions for transferring of registration certificates. Any errors discovered in this catalog will be corrected from the auction stand and will take precedence over printed material contained in this catalogue. Each animal becomes the responsibility of the purchaser as soon as sold.

BULL EVALUATION / HEALTH:

All bulls will have a complete, satisfactory, fertility exam and semen test done by Wagner Veterinary Services prior to sale. Bulls will not be sold on a 'deferred' result. For prevention of footrot, the bulls have received their first vaccination and will require a booster. Bulls were given Nasalgen at 2 weeks and have received two vaccinations of: Fermicon 7/Somnugen, Pyramid FP 5/Presponse and pesticide poured.

In the event that your bull is a non-satisfactory breeder please notify us immediately. He will be replaced with a bull of equal value or a credit will be given towards the purchase of another Delorme bull. We will not provide replacement or credit for physical injury or mismanagement.

Please join us for lunch on sale day

ON OFFER:

58 Registered Black Angus Bulls

Current weights and scrotal measurements will be available prior to sale.

VIEWING THE BULLS:

The bulls are available for your appraisal at the ranch until Saturday, March 29th. We welcome your visit! They will be moved to the Cowtown yards where they can be seen from Sunday March 30th until sale time.

VIDEOS:

Will be available via our website and on dlms.ca

INSURANCE:

Insurance will be available sale day, on location from a Blythman Agency's representative.
(306) 662-2604

\$100 OFF YOUR PURCHASE:

If you take your bull home the day of the sale upon satisfactory payment. Your bull(s) can be brought back to our ranch but they have to be insured. After May 1st -feed charge \$3.00/day. We will be in touch to arrange pickup or delivery prior to May 31st.

ONLINE BIDDING AND VIEWING:

DLMS Online Bidders:
Please sign up and confirm bidder approval prior to the sale.

Internet Bidding Available

PHONE BIDS & SIGHT UNSEEN PROGRAM:

If you are unable to attend the sale but are interested in bulls, give us a call and we will go over the bulls and your program and recommend bulls that would meet your needs and refer you to one of the sale staff who will represent your needs in a professional and confidential manner.

SEMEN COLLECTION:

We reserve the right to collect semen on any bull in the sale for in-herd use only. Any questions please contact Don or Darby.

SALE ACCOMODATIONS:

Cobble Creek Lodge: 306-662-5100
Willowbend Motel: 306-662-2555
Cypress Park Resort Inn: 306-662-4477
Maple Creek Motor Inn: 306-662-4431

Welcome Well here we are – 2025 and proudly bringing the boys to our 21st sale “in town”. Thanks to the bidders and buyers, friends and family, who have supported our program over the past six decades. We extend a special recognition to all - Sit back and give yourselves a pat on the back for staying the course and using the genetics you value. You are producing more pounds of beef, than ever before, even though our cow numbers are down. A combination of your work ethic and personal management practices is moving our industry forward despite the interferences.

We appreciate your time viewing the bulls catalogued, there is one for every need, whether you are turning them out with the old girls or into that replacement field. Either way, we want your selection to leave calves that impress, and the heritability that provides productivity and profitability. The bulls are not creep fed; mother's milk and arid shortgrass until weaning and they come to you sale day on a home grown mixed ration of silage, greenfeed and hay topped with mineral supplementation. We aim for a modest 3lb ADG to keep them functional. As commercial breeders ourselves, we understand the needs to hit the fall market and raise replacement heifers.

As a family-run operation, everyone plays a vital role in our day-to-day activities. Our homelife changed on December 9th with the loss of Mom and Dad, who were still actively involved in most of the goings-on. Their guidance, knowledge and traditional standards will serve us well.

In loving memory of Mom and Dad Wardberg

Josephine Elizabeth
and
Lawrence Alfred

*With profound and
absolute sadness,
we share their
sudden passing on
December 9th 2024.*

You never had to retire from farming. Something we all knew you never wanted to do – and you did it together.

One minute you were here, the next, you were gone. There was no opportunity to say goodbye, to tell you we love you, one more time.

Jo & Alfred Wardberg The original Prairie Pride Angus
est. 1948

Flo & John Delorme

The original
Jay En Dee Angus
est. 1963

- Page 44 is a tag # index (heifer bulls highlighted).
- Page 40-41 showcases the 1st and 2nd sires of our cows
- The Sale Order, Weights and SC will be available shortly before sale time on our web site and dlms.ca
- Bulls sell 'live in the ring'
- dlms.ca will provide online viewing and bidding
- Bulls are all parentage tested, semen-tested/scrotal measured and ready for your immediate use.

Thank You ~ Mark Forsyth, Ty Schwan, Shayla Duncan, Jesse Waldner, Kevin Bolduc and Chase Johnson for helping us get the bulls ready for picturing. We also appreciate and thank Tiffany of 14 West Creations for making sure our catalogue is properly prepared for printing.

We extend an invitation to inspect the cattle “in the flesh” and welcome any and all inquiries with the understanding that getting away is not always easy or even possible sometimes. For your convenience, we hope this catalogue offers an “in person” view of the bulls and our herd. Our websites also showcase our programs:
www.DelormeRanch.ca and www.BoundaryRanch.ca

We look forward to seeing you on April 1st. Thank you in advance for your consideration of our sale offering. We wish you the best of luck in securing your selection on sale day. Please join us for a pre-sale lunch and post sale hospitality where you can mingle with like minded producers.

Sincerely the Delorme Family

An end of February bull that has kept up with the big boys with 112 WW and 114 YW indexes – he's this sale's youngest. 250M is clean through the neck and shoulder, and maintains thickness and length through his body and carries down deep through the hip. His 180G dam is a Wrath 9C daughter – a deep, thick, easy fleshing tank. Take note of the Wrath daughters – tons of maternal - look to this fella to carry that forward. Top EPDs: 25% WW, 20% YW, 25% Milk

Longer bodied and bigger framed 31H son that is a really solid put together bull. 37M had my 3rd highest weaning weight at 840. His progeny will carry extra length which equates to additional sale pounds – a pennies on the dollar investment for your consideration. His 240E dam carries a large spring and length of rib, and a big ol' hip. She has a first-calving full sister to this bull in herd with sons going home to JPM Farms and Windy Ridge Ranch. 105 W/W Index, 106 YW Index. Top EPD: 25% W/W

Recommended for heifers.

Another larger framed Shooter with length of body typical of his sire and his phenotype. Super wide topped and big hiped. We hoped to show this bull last fall but unfortunately the rest of the show bulls decided to pick on him. He isn't halter broke but is nice quiet. Dam is made to last, not extreme in any way just a well put together cow. She has 2 daughters in herd. Great spread from birth to weaning starting at only 78 lbs, 271-day gestation then having the highest W/W index at 130. EPDs reflect that spread.

Recommended for heifers.

97M is long-bodied, deep-ribbed with substantial substance throughout his thick sound structure, a small head, lots of hair and style to burn. Should be a calving ease specialist with only a 64 lb BW and he is in the top 1% of the breed for CE and BW. 97M doesn't sacrifice growth having a 113 WW and a 121 YW ratio. His Dam, 203K is a feminine, sweet-made Shooter daughter with good feet and udder quality.

105M

Is a long, bigger framed son of Pine Drive Big Sky with extra stretch. We dug into the bottom of the AI tank for this popular sire from the early 70's. His EPDs show vintage status but expect growth and power especially when combined with his Dam's profile. She is a powerful, deep, thick tank that carries lots of flesh and is very easy doing. His GD is one of our favorites: find her on page 32 with her son 136M, as well as 136M's maternal sister 97F, on page 21 with lot tag 40M

A double bred EXT son which will leave you highly sought after replacements. Keep some – sell some and he'll repeatedly pay you dividends. A structurally sound, free moving, wide-topped, big capacity, hairy bull that will sire performance and maternally sound cattle. His Elite Dam, 154B is a deep, long, feminine cow with impeccable udder and foot structure. At 11 years of age, she is youthful in appearance. Sons to Casey Gordon, McKelvey Farms and Darcy Berreth with her Resource 191J son retained for use in our commercial herd.

Attractive in his makeup – stout – length of body and balanced in structure with big time growth. One can't go wrong with his ability to sire a strong group of sale calves. His personal performance was a 4.3 lb ADG from weaning to yearling ~ earning him a 133 YW index from a 107 W/W index! 63Z sons to Sandhills Cattle, Brett Bock, Allen & Lynne Frank, J Gordon, Homestead Angus and Bob Purves. A daughter's son leads of the catalogue as 120M (pg 6). Top EPDs: 25% W/W, 8% YW

Know Hows are very similar in phenotype, with growth and length, and foot quality is well above average as well. This guy has it with hair and length of rib. Dam is a smaller easy keeping female with a tidy udder. She had one of our top bulls last year but he died to injury. Grand dam 32T put many bulls through the sale.

Super deep-sided, bold and thick in his makeup. He is long spined and proud fronted standing on a good foot with ample bone structure. Could be the power sire in your herd bull battery – 106 W/W and 127 YW Indexes to bottom out the scales. His Dam is massive, long, thick, and an easy-fleshing Resource daughter who finally gave us a heifer in 2025. She has three sons in the Horton Land and Cattle herd, with two going to Sandhills Cattle and Manyberries Creek Ranch.

Recommended for heifers.

Here is a bull with a calving ease birth weight of 68 pounds and a 279 day gestation. He profiles from the back and side as stout with thickness and dimension with smoothness through his shoulder. Should sire calves that wean up with the group from older cows. His feminine Dam put everything into this fella and is now developing into the broodiness of her Diamond lineage – GD, 53Y was a producer of 11 calves. The GGD, 47S sits in the same pedigree spot for 171M (pg 12), and 170M (pg 17). 112 WW and 106 YW Indexes.

Recommended for heifers. Truly a calving ease sire. He is a very interesting, low birthweight option with only a 267 day gestation and a 73 lb birthweight ranking within the top 4 percentile of the breed for CE, BW and MCE, then kicks it up a notch to be in the top 9% for WW and YW EPDs. He is soft made, balanced with a great set of wheels, which will all serve to add depth of body and maternal traits. He is backed by our very strong Errolline cow family. His Dam 128E is a front pasture kind of cow; ideally built with impeccable foot and udder. Sons going to Jay Lerner, Ironside & Son Cattle Co Ltd, and J Over K Ranch. A daughter has son 209M (pg 17) Top EPDs: 1% CE, 3% BW, 9% WW, 7% YW, 4% MCE

Recommended for heifers. Small head, smooth shoulder, long clean structure – he profiles very nice with a balanced look. Good spring of rib with a hip that carries down nice and low, all wrapped up in a hairy coat. His Resource sired Dam, 123J, is just flat out, a beautiful young female out of our 18R cow that carries Elite status. 1st calf, a son, went to Mike Wilson. A full brother sired 13 sons selling through this sale and 6 females working in our herd. 123J has two sisters with sale bulls: 138M (pg 25) and 229M (pg 8). Recommended for heifers.

Lower birth weight performance bull that has a low gestation of 275 days but huge growth indexing 121 at YW. This guy is going to be one thick huge assed bull when he fully matures. He is definitely smooth through his body with very thick hip structure. Dam for a 13-year-old is still raising the good ones; she still has a fabulous udder for her age also. Longevity is the key with tighter income margins, and she holds that standard to a T. She has 3 daughters in herd and sons sold to Flying T Ranch, and D/S Elliott.

Big curve bender performance bull here. Gestation of only 275 days but had the highest actual weaning weight and indexing 119. Larger frame with a lot of depth and length that's still balanced in his make-up. Dam is a super deep, pear shaped female. Born from this family, 82M should make tremendous females as well. Great grand dam 904W was a looker that always caught the eyes of people touring the herds.

Recommended for heifers.

An easy calving, hairy, Sterling son with a super quiet disposition. A low birthweight, short gestation bull with thickness and depth – maybe hard to believe he started out at 75 lbs but his Dam has always thrown lighter birthweight. She is feminine in her makeup, and standing on a great foot, and has sons working in the Hawkeye Angus and Ethan David herds.

136M has the presence and that proud herd bull look. A performance highlight who is massive from every angle; massive volume, massive dimension and massive performance with over a 4 lb ADG earning him the highest actual weaning and yearling weights. He posts an impressive 117 W/W and 130 YW index. If you are wanting to fix up those reputation steers and females, have a look here, this is your guy... hair, testicles, bone, foot AND a quiet disposition. The best part of 136M is his Elite Dam; sound in structure, long-bodied and she flat out produces no matter what we breed her to. She has five daughters in herd-they are that good! Her 11 calves are averaging a 109 W/W and a 121 YW indexes. You'll find her two Grandsons as 40 M (pg 21), and 105M (pg 20) plus, she is the GGGD to 58M (pg 37). Sons to Tony a& Carolyn Leismester, Tateson Ranch, Story Family at Dolittle Angus. Top 1% in W/W and YW EPDs.

Recommended for heifers.

Very moderate birth weight with the capacity for growth and performance as his EPDs indicate, as well as his 112 W/W index. He is long, smooth-sided, thick-topped, and bold ribbed. Dam is a Thunder daughter who is attractive looking, feminine with a bit bigger frame and good lines. 117M's GD, 225G, produced another feature lot in tag 75 (pg 39).

Recommended for heifers.

Smaller framed bull that is balanced and smooth in his lines and a ton of hair to boot. Dam is a big powerful cow that always puts out the performance type cattle. She has 3 daughters in herd, one with a son in sale 218M. 50A also had sons to go to C/N Schock, and Notekeu Grazing. EPDs TOP-9% W/W, 8% Y/W

Recommended for heifers.

Dam had the high selling bull in 2023 sale to Wade Olynk of Crecent Creek Angus, 3/4 brother to this bull. Dam is moderate framed, balanced, and close as you can get to a perfect uddered. She has one daughter in herd. 10M is patterned much like the bull Wade bought, long and very square made. His phenotype, low 78 lbs birth weight, short 273-day gestation, and great calving ease EPDs make him a sure fire candidate for the heifer pen. EPDs TOP-2% CE, 3% BW, 20% DMI, 15% SC, 20% ANGLE, 25% MARB, 20% REA, 15% FAT, 2% MCE

A masculine, big, stout-bodied bull who is square hipped and structurally sound – just all around good growth and maternal values with 108 WW and 119 YW indexing. His attractive Dam is one of our thirteen Wrath 9C daughters. Small teats, beautiful udder attachment and easy fleshing characterize these females with docility at the fore-front. Her daughter produced 117M (pg 36).

How To Read EPDs and Performance Data

EPD's are a measure of the expected differences in performance of a sire's/dam's progeny when compared to the average progeny of all sires/dams evaluated within the same breed. This prediction is based on actual performance, progeny performance and relatives' performance.

- EPDs can be used to compare bulls/cows from different herds.
- EPDs cannot be used to compare bulls/cows of different breeds.
- EPDs allow breeders to estimate a young animal's breeding value and that animal's value as a parent
- EPDs allow a fair comparison of breeding value by removing environmental bias such as climate, feed and special management
- EPDs are the best tool available to compare animals between herds, countries and year of birth
- EPDs help breeders make informed decisions regarding breeding stock selection by evaluating numerous traits, such as growth related traits (BW, WW, YW, Milk)

- **CALVING EASE DIRECT (CE) EPD:** The average difference in ease with which a sire's calves will be born when he is bred to first calf heifers.
- **BIRTH WEIGHT (BW):** The birth weights of a bull's/cow's progeny when compared to the breed average, in pounds. Negative values indicate lighter BW while positive numbers indicate heavier.
- **WEANING WEIGHT (WW):** The adjusted weaning weights of a bull's/cow's progeny when compared to the breed average, in pounds.
- **YEARLING WEIGHT (YW):** The adjusted yearling weights of a bull's/cow's progeny when compared to the breed average, in pounds.
- **MATERNAL CALVING EASE (MCE):** Is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
- **MILK:** A measure of the amount of pre-weaning performance gained by calves which can be attributed to the milking ability of a bull's/cow's daughters. The EPD is expressed in pounds of calf.

The Elite/Premier Program

Canadian Angus Elite Cow: has a minimum of five calves, four of which must be registered, to determine her regularity of calving and ability to consistently produce calves with a superior weaning weight year after year, display early puberty, breeding and early calving, followed by regularity of calving and high performance offspring.

Canadian Elite Cow Criteria

1. The cow must be enrolled in the Canadian Angus Performance Program.
2. The cow must have a calf with a 205-day weight recorded within the past 18 months.
3. The cow must have her first calf within 1000 days of her date of birth
4. The cow must maintain a regular calving interval, calving within 395 days consecutively
5. The cow must have four consecutive natural born calves that are registered and have a weaning weight ratio that averages over 105
6. The cow's calf must be in a contemporary group with no less than 10 herd mates to determine the weaning weight ratio
7. Once a cow is designated an Elite Cow, she is always an Elite Cow, however she will not be published in a year where she does not meet the above criteria

Premier Dam Criteria

As in 1 to 4 above

5. The cow must have four consecutive natural born calves that are registered
6. The cow's four calves must have Weaning Weight EPDs that are above breed average and have an accuracy of over 25%
7. The cow must have at least two registered grand calves
8. Once a cow is designated a Premier Cow, she is always an Premier Cow, however she will not be published in a year where she does not meet the above criteria.

Commercial Open Replacement Heifers By Private Treaty At The Ranch

COMMERCIAL OPEN REPLACEMENT HEIFERS

Spring Offering of 40 Heifers ~ by Private Treaty

From the Delorme and Wardberg commercial herds is the 39th Annual offering of Black yearling heifers.

Straight Black Angus & Black Simmental/Angus

Pictures / videos on
our web site at
www.DelormeRanch.ca

1948: the year Grandpa (Ole) Wardberg brought the first Black Angus females to this area. Four generations later and we still look across our fields at straight black angus cows. You'll have the opportunity to purchase from 40 home-grown Black replacement heifers.

Half of the commercial herd are bred Black Angus, the other half, Black Simmental from Darby and Sarah's registered Boundary herd. This will be our 39th annual offering of April/May born Angus females with 2025 marking the 15th offering of the F1 crossbred Black Simmental/Angus Heifers.

Videos, Pictures, Pedigrees, Prices of horses *currently offered* at www.DelormeRanch.ca

For over 30 years we have been shaping up an APHA/AQHA breeding herd and raising all-a-round, versatile, performance horses for the ranch and for the arena. The ranch raised weanlings, yearlings and riding horses are valued by their new owners and excel in all areas of the equine industry.

We currently stand 3 stallions, on quality mares, which are producing the bone, size, versatility and disposition in what we offer you.
