

The logo is circular, framed by a thick, coiled rope. Inside the circle, a silhouette of a cowboy on a horse herding a group of cattle is visible against a dark background. The text "Southwest Showcase" is written in a stylized, cursive font across the middle, with "SWS" in large, bold, gold letters with blue outlines. Below that, "SIMMENTAL BULL SALE" is written in a smaller, blocky font with a blue outline.

*Southwest Showcase*  
**SWS**  
SIMMENTAL BULL SALE

A large, atmospheric photograph of a cowboy on a horse silhouetted against a sunset or sunrise sky. The cowboy is on the right, and the horse is on the left. The landscape is hazy and golden.

**W**elcome to the 2nd Annual Southwest Showcase Bull Sale. The Southwest Showcase group has put together a very impressive set of bulls for your appraisal. These consignors are committed to the cattle industry and strive to bring you, the customer, a top quality product each year. Although this is only the second year for this sale, none of these contributors are strangers to the bull business.

In this year's offering there will be something for everyone. There will be bulls to add pounds to your calf crop and bulls to turn into the heifer pen. These bulls are all raised under very no-nonsense conditions and will go out and work. The offering consists of bulls that possess breed leading genetics from each program. Plain and simple, these bulls will go out and work for their new owners.

Feel free to give the consignors a call to discuss your herdbull needs. We at Bouchard Livestock also invite your inquiries and would be happy to go over the offering with you. If for any reason you are unable to be in attendance on sale day we would be pleased to represent you in a professional and confidential manner. Look forward to visiting with you in Swift Current.

## Sale Headquarters

Holiday Inn Express ..... 1.877.654.0228

## Meal

Please join us for a pre-sale lunch at noon

## Sight Unseen Purchase Program

If you are unable to attend the sale but are interested in bulls, give the consignors a call and they will personally go over the bulls and your program and recommend bulls that would meet your needs and refer you to one of the sale staff who will represent your needs in a professional and confidential manner.

## 100% Guarantee

All bulls are guaranteed to be satisfactory breeders in accordance with CSA guidelines. Should a problem occur barring physical injury or mismanagement, a bull of equal value will be provided or a credit will be issued towards the purchase of another bull. We guarantee you will have a bull to service your cows.

## In-Herd Use Semen Rights

The Southwest Showcase consignors reserve the right to collect semen on any bull in the sale for their in-herd use only. Any questions please contact the consignors.

## Health and Fertility

All bulls will have a scrotal measurement and a vet examination done prior to the sale. All bulls over 12 months of age will also be semen tested; any bulls under 12 months of age will return to the seller's farm to be tested after the sale. These bulls will be delivered once a semen test has been passed. All bulls have been treated with Ivomec and have current vaccinations. Contact the breeder for specific herd health programs.

## Bull Development & Delivery

The Southwest Showcase consignors will keep bulls free of charge until May 1st, 2010. Buyers need to insure the bulls while being cared for by the consignors.

Option A: Bulls can be picked up at Heartland Livestock sale day and a \$50 discount will be deducted from the sale price

Option B: At the buyer's option and risk, the bulls can be returned to the consignor's farm and picked up anytime at the buyer's convenience.

Option C: Please make arrangements with the consignor if trucking is required.

## Terms & Conditions

The cattle will sell under the standard Bouchard Livestock International terms & conditions. These are on the inside back cover.

## EPD Explanation

EPDs are "Expected Progeny Differences". They are a useful tool in selection. EPDs incorporate the individual animal with its averaged ancestry performance. EPDs do not compare across cattle breeds, they are individually based per breed. EPDs indicate a probable variance above or below breed average for that trait for a given bull's progeny. Use them for guidance in the direction you want your herd to go.

Spring 2011 Simmental Breed Average EPD's

Welcome to our 2nd Annual Southwest Showcase Bull Sale. We would like to say a big thank you to all of our past customers, and look forward to seeing everyone at this year's sale. We are a family run operation located Northeast of Waldeck, and have been raising registered Simmental cattle since 1974. Our cowherd is built on strong maternal genetics, through both A.I. sires and natural service.

A year has passed, and what a change in the cattle market. Top cut calves and premium bred heifers are demanding a price that no one could have projected. Quality bulls produce quality offspring, which in turn generates a higher return on investment.

We are very proud of the bulls we have on offer. Moderate birth weights, volume, thickness and good hair are traits that these bulls will surely pass on to their offspring. Whether you're looking for performance, calving ease or maternal genetics, we have a bull to fit your program.

If you require any further information about our sale offering, be sure to give us a call.

Inforcer is a true standout! Deep bodied with tremendous width over the top, loose hided, dark red and a great coat of hair. This bull moves out so well and is right in so many ways. He is out of a high volume first calf heifer that did a tremendous job raising him. Shear Force is known not only for his tremendous calving ease, but also for his ability to sire deep sided offspring that are full of eye appeal. Inforcer is all of that and more with his low birth weight and tremendous muscling, all in a very complete package. We believe this bull will have a big impact for his new owners.

*Here's another smooth made, dark red Unified son with lots of middle. He will be an easy calving herdsire that will leave a very uniform set of calves. A maternal brother sold to Dustin Hawkins in last year's sale. This bull is well put together, moves out well and will be a real asset to someone's herd.*

# Crocus Simmentals

There is one word to sum this calf up: Stout. From every angle he is impressive. Deep hearted, full through the flank and a huge hip that carries all the way down. When you get in behind him, he has so much width and spring of rib. The fact that he has a great coat of hair is just a bonus. Bodybuilder, Red Label, Quorum and Red Bear have been some of the most influential bulls in the breed, and they all show up in his pedigree. He goes back to the 16P cow family which we have really based our red program around, and he will be a bull to take your program to the next level.

Here is a real smooth shouldered, long bodied, dark red bull. Take a look at his Calving Ease, Birth Weight and Milk numbers. They are some of the best you will find and when you look at his pedigree, it's no secret where these numbers come from. Bravado and Shear Force have been two of the top calving ease and maternal bulls in the breed for the past few years. Bravo will surely transmit these excellent traits to his calves.

 neitz@yourlink.ca

Welcome to the Second Annual Sale. We would like to thank everyone who helped make last year's sale the great success it was. We would also like to express our appreciation to all buyers and bidders of our bulls, past and present.

We have worked to breed hardy trouble free cattle and believe very strongly in building around cow families. Some of these families are the 52C Red Bear daughter that was very reliable and at 16 years of age still had perfect feet & udder. Two full sisters by Americana, 29G & 10E whose influence is always seen in the bull pen and when we select replacement heifers. The 68D Blue Print cow that mysteriously shows up in the pedigree of many of the good ones. 46Z, a Universe daughter, was part of the early foundation of our herd. We have retained most of the daughters and many sons from these families. We have done some line breeding of these families with good results.

Our cow herd receives Pyramid 5FP before breeding. All calves have received 2 shots of Pyramid 5FP, Presponse SQ, Seven Way Somnus and Ivomec. Homozygous polled tests are pending on some bulls.

We are pleased with the group of bulls we have to offer, and will present them as we would like to buy them - not over fed, no feet trimmed, semen tested and ready to breed cows. We stand behind our bulls, if any problems arise, please do not hesitate to call. Bulls are available for viewing any time at the farm.

Ragu has had that herd bull look all summer long and has gotten better with age. He has a thick top with a full deep quarter and flank, long easy stride and heavy hair coat. Good disposition, testicles and good balanced EPD's complete the package. 76X's nice uddered 2 year old dam is an outstanding EDN Rocky daughter that represents several retained herd sires and proven cow families. EDN Vico's(40U) first calf crop was small in numbers but high in quality. Watch for many more progeny in the future.

Another outstanding Vico 40U son, very similar to 76X. Small head & 86 lb. birth weight, 5 generations red. Mothered by a moderate, easy fleshing EDN Red Nugget, 2 year old heifer from the 68D cow family.

**EDN UNITA 123U**  
Dam of Lot 12

If you like bulls that are good footed, quiet, easy going, long and thick with large testicles you need to consider 75X. The only EDN Sprout 48S son offered but he is a good one.

His dam is a beautiful dark red brockle face cow and a direct daughter of the EDN 68D Blue Print cow that has become one of our best red & black cow families.

EDN Sprout 48S had been retained as a backup bull, but has now become an important part of our program, at 5 years old his feet are perfect, his attitude is unbelievable and he is a bull that will easily maintain and even fatten on hay. He is a Grandson of the 29G cow.

47X, the only Red Texas son we are offering could be the most complete black we have raised. As thick topped and deep bodied as they come. Easy going, big correct feet, large testicles and he moves like a cat. I don't know where I would change him. We would like to reserve the right to draw semen for use in our herd at our expense and your convenience.

With his EPD of +9 for calving and 70.7 for yearling wt. He should sire calves that come easy and grow well. He will improve feet and legs, udders and attitudes. 72J has had a big impact on our herd and at 12 she is going strong and appears much younger. On Feb. 2, 2011 she produced her 12th outstanding calf and every one has been the result of a single A.I. service. Six Daughters have been retained in our herd (including 1 set of twins). Sons have sold to Gerald Prefontaine, Herter Simmentals, David Drever and Adam Reiling.

Very popular and predictable red & black genetics here. 68X is a maternal ½ brother to the EDN Vico 40U bull that has worked so well in our program. 93S is a smaller framed, easy fleshing, heavy milking cow. A son went to Colin Haggart as last year's sale.

45X has been popular with visitors and a favourite of ours from an early age. He is an eye catching dark dark cherry red with a really nice hair coat. Long, smooth, clean fronted and deep bodied. He has the conformation to get out and cover your pasture and the toolbox to get the job done. This bull has the EDN 46Z cow on both sides of his pedigree.

The sire EDN Voodoo 72U saw limited use in our herd before he was sold to Stoughton Farms at Maidstone. Watch for some good calves to come out of their herd. EDN Trish 17T is a moderate frame size and so completely sound, productive and fertile. I wish I had 100 just like her.

The youngest bull in our offering, but he stands right up with the older bulls. 185X is naturally thick, loose made, very hard to fault. Use him on cows to produce money making steers and productive replacement heifers with substance & style. His young dam has put two very good daughters back into the herd, is also the Granddam of 36X. She is a descendant of the 46Z Universe cow. KWA Red Steve 100U was purchased at the 2009 Ashworth & Quests bull sale where he was Kelly's top selling bull at \$8,000. 100U produced our 2 highest performance bull calves including a son that will be retained. They are good footed calves with quiet dispositions and large testicles. The daughters are good bodied, clean fronted and have all been kept for replacements.

Welcome to the 2nd Annual Southwest Showcase Simmental Bull Sale! We are excited to be involved with such a great group of people in bringing this sale to you. Our offering is small but high in quality.

The bulls have been fed on a high % oats ration and crested wheatgrass diet. They have had NO creep. The bulls are bred for longevity and we stand behind them. They have been igenity profiled and color and polled tested. The profiles will be posted sale day or by request if you wish to see them earlier. Scrotal measurements will be posted on our website as they become available. If you have any other questions feel free to give us a call.

 WHEATLAND BULL 468P  
 TSZ MADE SWEET 7P

407X is a smooth made, clean fronted, moderate son of Goldmine and TSZ Adara 206U (Hummer 468P). With just an 83 lbs. BWT Full Tilt combines calving ease and style with enough performance to add those extra pounds to your calf crop. We feel this bull will work well on British based cows with his females being an asset.

 TNT TOP NOTCH 29P

Gridiron is the super stout Homo Black, Homo Polled son of Mader P Iron Man and out of a big volume, hard working female with a unique pedigree. He has eye appeal, good hair, lots of middle, large testicles, and great structure. Gridiron is excellent footed, has fluid movement and tracks really well. We feel he is one of the best bulls we have raised and should produce some powerful progeny. We reserve the right to draw 100 straws of semen for in herd use at our expense and your convenience.

**Homozygous Black & Homozygous Polled**

 kelarafarms@hotmail.com

Welcome to the 2nd Annual Southwest Showcase bull sale! At this time, I would like to thank all the other consignors, as well as the bidders and buyers for making our first sale such a great success.

We are offering an honest set of bulls, which will go out and do a very good job for thier new owners. Due to an excessively wet summer and late harvest, the bulls were not weaned until the end of October. They were weaned onto a high forage diet, and were introduced to pellets in January. The bulls are on a full vaccination program, which includes: Pyramid 4, Seven-Way, and Pour-on Ivomec.

We welcome any one who would like to stop by for a visit; as we are 2 miles south of Shaunavon on Highway #37, and 4 miles east. Feel free to give us a call, if you have any questions in regards to the bulls or the cow herd, we would love to visit with you. We look forward to seeing you at the sale!

This calf has been a stand-out since day one. Rockstar is sired by the infamous 680S and mothered by a moderate-framed, beautiful uddered, Goldmine female. He is flawless in his phenotype, and has lots of capacity and length of spine. The dam's Ranchhand calf sold to George Ehret, of Irvine, at last year's sale.

## X-T Simmentals

Don Lundberg  
 Box 297 - Eastend, SK - S0N 0T0  
 P. 306.295.3843  
 Ryan Cell. 306.295.7999  
 x-tsimmentals@explornet.com

Welcome to the second South West Showcase bull sale. Our family has lived here in the Cypress hills since 1909 and has been raising Simmental cattle since 1971. Ryan and Julie are the fifth generation to have lived and worked on our ranch.

We have a mature cow herd of 350 cows plus bred heifers. We only retain 25 bulls so the selection process starts as soon as they are born. Our cattle are selected for low maintenance and "do it on their own" traits. With cow herds getting larger and less people to do the work, we realize that these were the type of bulls that our commercial bull customers need. We sell only a small number of females every year through the Agribition and Southwest simmental sales where many of these females have gone on to be feature cows for their new owners.

Thank you to all who attended last year's sale and we hope to see you all back again this year. If you have any questions about the bulls please feel free to call Don or Ryan any time.

Turbo Charged could be that outcross red bull everyone is searching for. He is very moderate, extremely thick and very fancy. A 276 day gestation and a light birthweight of 76 lbs. sure didn't hurt his performance. There was no creep feed on any of our bulls, just rich milk and lots of good native grass. We raise our cattle under the same conditions as our commercial bull customers. Please note the ages of our string of bulls as they are considerably younger than most of the rest of the bulls you will see sold this spring.

200 day wt - 953 - 1/10 - 107  
 Feb 2 wt at 294 days of age - 1125 lbs.  
 Dec 1 - Feb 2 A.D.G. - 3.85lbs.

Turbo Charged has been Igenity tested and results should be available by early March.

[www.boundaryranch.ca](http://www.boundaryranch.ca)

Welcome to the 2nd Annual Southwest Showcase Bull Sale. We're very proud of our cows on our family run Ranch. Many of the bulls in this year's sale offering are out of 2 year olds, and although they are relatively unproven, these females have many generations of proven cow families behind them, and they've done a heck of a job on their first calves. All of the bulls are out of AI sires that we selected for use based on their ability to produce both excellent females and bull calves, with a balance of calving ease and performance.

A big advantage to the later sale date is that our bulls do not have to be pushed to be in the right condition for this sale and to go out and work for you. All of the bulls have been Igenity Profiled and Polled tested. For more information or to view each bull's profile, please visit our website or give us a call and we'll be happy to go over the results with you.

Visit our website at [www.boundaryranch.ca](http://www.boundaryranch.ca) to view the bull's scrotals, as soon as they become available, pictures of Dams, Sires, siblings and more information. Give us a call or stop by anytime and we'll be happy to show you around the bull pen and our cow herd.

Thank you to Bouchard Livestock for the excellent job they do with the sales management. A big thank you to all those who have supported our program in the past; we look forward to seeing you all sale day!

### HOMOZYGOUS POLLED/Scurred

This extremely docile cherry red bull has it all – the depth, the length, the width, a clean sheath, and muscling carrying right down into his twist. He has a low 74 lbs BW paired with the highest Index of our red bulls for WW & YW. His Grand Dam was the high seller at the Kimlake Dispersal going to Jay Dawn Farms and was also a member of the Champion of heifers at the PCBC as a calf. His dam is a perfect uddered, extremely deep and wide, cherry red two year old Red Label daughter that we're sure is going to be one of our top producers. Bravado 8X was the Champion Bull at the Swift Current Pen Show and based on his pedigree and phenotype, is a real sale feature.

Renata 20R with her 2009 heifer calf

19X & 20X are twin brothers out of the Renata cow family; both are very docile and have a lot to offer but they definitely are not identical. 19X is smooth made, moderate, stylish, and perfectly balanced. He was raised by a two year old Angus heifer that did a heck of a job, but had a tough time competing with Renata 20R who has tons of milk. 20X indexed 104.6 for WW and 105.8 for YW. He is a big performance bull with lots of length, width, and muscling. Renata 20R is the Grand Dam of the heifer we sold at the Agribition Sale in 2009 to Tessier's, also sired by Bravado. Pick style, performance or both – whatever you choose, we're sure you'll be happy with a Renata son.

The AI Sire Bravado P68 is renowned for his calving ease, but we like to think of him as a performance bull with a low gestation. Bravado 14X had a gestation of 278 days and a nice low BW of 73 lb, but still was one of the highest indexing bulls at 105.3 for YW. He has EPDs in the top 3% for CE, 2% for BW and 30% for MCE and is backed by a really powerful Top Gun two year old. Calving ease and performance – no guess work here!

We like the balance of low birth weights and performance that the Easy Money bull provides, and we love the confirmation of both the bulls and females. Easy Money 82X has a nice little head, smooth shoulders, good muscling and is moderate framed, like his mother. His dam is a fancy, "Boomer" cow with tons of milk. 82X has a moderate birth weight and with "Easy Money" and "Boomer" in his pedigree, he should work well on heifers.

# Boundary Ranch

It's no surprise that our feature black bull is out of the Abricot family – there is no more reliable source on our ranch for top-notch genetics. Hustler 31X is always the first black bull to catch anyone's eye in the bull pen and the same holds true for his Dam in our pastures. He has the same depth of rib, style, and hair coat as Abricot 511R, with the added benefit of a couple extra ribs. 31X should sire an impressive calf crop with Hustler, Temptation, and Abricot blood running through his veins. Here's a Herdsire Prospect with the "look" and predictability.

WFL MS WESTWAY 27L

18X is a deep bodied bull with a nice low BW and EPDs for CE in the top 2%, BW in the top 5%, and Milk in the top 30%. He's above average for performance, ranking 3rd for WW and 2nd for YW. His maternal sister by Trademark is a beautiful exceptionally deep heifer and he shares the same Great Grand Dam as our lead-off red bull. 18X combines the calving ease of his Shear Force Sire with the performance of his "Dynamite Black" dam.

**HOMOZYGOUS POLLED - HETEROZYGOUS BLACK**

**BOUNDARY REBECCA 38W**  
Maternal sister to Lot 67 by Trademark
